Maria

I refer to your correspondence of 25<sup>th</sup> November 2008 in connection with the application by Foynes harbour Board for a permit to facilitate the construction of a piped outfall on foreshore and associated bed protection works at Foynes Harbour, Limerick.

The Marine Institute has no objections in principle to a permit being issued but would recommend that the applicant be ed to provide a py of effluent discharge permit issued by the Local Authority.

Terry

**Re: Foreshore Licence Application – Foynes Harbour, Co. Limerick**

A Chara,

We refer to the application in relation to the above-proposed development. Outlined below are the nature conservation recommendations of the Department of the Environment, Heritage and Local Government.

This development will have an insignificant impact on the Special Protection Area (SPA) and candidate Special Area of conservation (cSAC) as the buried part of the pipe is likely to be quickly covered with estuarine sediments and the remaining works above the sea bed comprise a very small area.

It is recommended that the works take place outside the period November to February so as to reduce the impact on wintering waders and wildfowl.

Is mise le meas,

No of Pages	1
Date	16 December 2008
Reference	MS51/10/132 Outfall pipe . Shannon Estuary. Foynes
CC	

- This office has no objection to the above application from a navigational safety perspective.
- The applicant is required to arrange the publication of:

(A) a local marine notice. This local marine notice should give a general description of operations and approximate dates of commencement and completion. An advertisement in a locally read newspaper will suffice.

(B) a Port Marine Notice issued by the Shannon Foynes Port Company.

- Full consultation with Shannon Foynes Harbour Master is required in this matter.
- The views of the Divisional Engineer should be sought.

Yours faithfully

*Nicholas W. Cantwell*

**Subject:** RE: Durnish Terminal Outfall & Marine Notice

Bryan,

We have looked at the proposed pipework and are of the opinion that this poses absolutely no danger to the safety of Marine Navigation in any way.

Consequently there will be no need to issue a marine note to mariners – we shall not be issuing a Port Marine Notice.

Best regards

Alan

**To:** O'Neill, Pat  
**Subject:** MS51-10-132 Foreshore Application for construction of piped outfall through foreshore and associated bed protection works at Foynes Harbour, Limerick

Mr O'Neill,

Further to your correspondence with Mr Tony O'Sullivan of this office, I have inspected the site, licence application document and planning application information relating to the above foreshore application.

The outfall is located in the industrial port at Foynes Harbour and will discharge storm water and treated foul effluent. This will be subject to a discharge licence from Limerick County Council, which the applicant says he has received.

I have no objection to the proposed development from an engineering perspective. The applicant should be asked to submit a copy of the discharge licence from Limerick Co Co, for our files.

Regards,

Noel Dillon
