no.	II. Health int	formation II.a. Certificate II.b.UNN reference number				
ati						
i,	I, the undersigned, official veterinarian, of the exporting country (2) hereby					
i.f	certify that:	(name of exporting country) certify that:				
Certification	II.1.	The semen collection centre in which the semen described above was collected, process and stored for export to Great Britain:				
: II	II.1.1.	is approved and supervised by the competent authority according to the conditions of Chapter I, Annex D to Directive 92/65/EEC,				
Part	II.1.2.	is situated in the territory or in the case of regionalisation according to Article 13 of Directive $2009/156/EC$ (6) in a part of the territory of the country of export which was on the day the semen was collected until the date of dispatch free of:				
		- African horse sickness, in accordance with retained EU law,				
		- Venezuelan equine encephalomyelitis for 2 years,				
		- glanders and dourine for 6 months;				
	II.1.3.	was during the period commencing 30 days prior to the date of collection of the semen until the day of its dispatch not subject to a prohibition order for animal health reasons which laid down one of the following conditions:				
	II.1.3.1.	if not all the animals of species susceptible to the disease located in the holding were slaughtered or killed, the prohibition lasted for:				
		 6 months, beginning on the day on which the equidae suffering from the disease are slaughtered, in the case of equine encephalomyelitis, 				
		 a period required to carry out with negative result two Coggins tests 3 months apart in the animals remaining after the infected animals have been slaughtered, in the case of infectious equine anaemia, 				
		- 6 months, in the case of vesicular stomatitis,				
		- one month from the last recorded case, in the case of rabies,				
		- 15 days from the last recorded case, in the case of anthrax.				
	II.1.3.2.	if all the animals of species susceptible to the disease located in the holding have been slaughtered or killed and the premises disinfected, the prohibition lasted for 30 days, or 15 days in the case of anthrax, beginning on the day on which following the destruction of the animals the disinfection of the premises was satisfactorily completed;				
	II.1.4.	contained during the period commencing 30 days prior to semen collection and lasting until the date of its dispatch only equidae which were free of clinical signs of equine viral arteritis and contagious equine metritis,				
	II.2.	Prior to entering the semen collection centre the donor stallions and any other equidae located in the centre:				
	II.2.1. were continuously resident for 3 months (or since entry if they were directly imp from Great Britain during the 3 months period) in the territory or in the case of regionalisation in a part of the territory(1) of the country of export which was during that period free of:					
		- African horse sickness, in accordance with retained EU law				
		- Venezuelan equine encephalomyelitis for 2 years,				
		- glanders for 6 months,				
		- dourine for 6 months;
