	II. Health Information II.a. Certifica	te reference No				
	II.1 I, the undersigned official veterinarian, declare that I have read and understood Regulation (EC) No 1069/2009 of the European Parliament and of the Council(1a) and in particular Article 10 thereof, and Commission Regulation (EU) No 142/2011(1b), and in particular Section 1 of Chapter II of Annex X, and certify that:					
Part II: Certification	,	there from or product described above contains exclusively processed animal protein not intended for human				
	(a) has been prepared and stored in an establishment or plant apprint in accordance with Article 24 of regulation (EC) No.1069/2009.					
	(2) - either Black Soldier Fly (Hermetia illucens); (2) - and/or Common Housefly (Musca domestica); (2) - and/or Yellow Mealworm (Tenebrio molitor); (2) - and/or Lesser Mealworm (Alphitobius diaperinus); (2) - and/or House cricket (Acheta domesticus); (2) - and/or Banded cricket (Gryllodes sigillatus); (2) - and/or Field Cricket (Gryllus assimilis); and (c) has been processed by method [1]-[2]-[3]-[4]-[5]-[7] (2) as set of 142/2011; and (d) the substrate for the feeding of farmed insects may only contain products of animal origin of Category 3 material: - fishmeal; - blood products from non-ruminants; - di and tricalcium phosphate of animal origin; - hydrolysed proteins from non-ruminants; - hydrolysed proteins from hides and skins of ruminants; - gelatine and collagen from non-ruminants;	(2) - either Black Soldier Fly (Hermetia illucens); (2) - and/or Common Housefly (Musca domestica); (2) - and/or Yellow Mealworm (Tenebrio molitor); (2) - and/or Lesser Mealworm (Alphitobius diaperinus); (2) - and/or Banded cricket (Gryllodes sigillatus); (2) - and/or Banded cricket (Gryllodes sigillatus); (2) - and/or Field Cricket (Gryllus assimilis); and (c) has been processed by method [1]-[2]-[3]-[4]-[5]-[7] (2) as set out in Chapter III of Annex IV of Regulation (EU) No 142/2011; and (d) the substrate for the feeding of farmed insects may only contain products of non-animal origin or the following products of animal origin of Category 3 material: - fishmeal; - blood products from non-ruminants; - di and tricalcium phosphate of animal origin; - hydrolysed proteins from hides and skins of ruminants; - gelatine and collagen from non-ruminants; - eggs and egg products; - milk, milk based-products, milk-derived products, and colostrum; - honey; - rendered fats; and (e) the substrate for the feeding of insects and the insects or their larvae have not been in contact with any other				
	materials of animal origin than those referred to in point (d) and the substrate did not contain manure, catering waste or other waste.  II.3 the competent authority examined a random sample immediately prior to dispatch and found it to comply with the					
	following standards (3):  Salmonella:  Absence in 25 g: n=5. c=0, m=0, M=0	, ,				
	Enterobacteriaceae: n=5, c=2, m=10, M=300 in 1g;					
	II.4 the product has undergone all precautions to avoid recontamination v	the product has undergone all precautions to avoid recontamination with pathogenic agents after treatment;				
	II.5 the end product was packed in new or sterilized bags or containers ready for sale with a total weight up to maxim 10 kg which bear labels indicating "NOT FOR HUMAN CONSUMPTION PROCESSED TERRESTRIAL INVERTEBRATES – SHALL NOT BE USED IN FEED FOR FARMED ANIMALS EXCEPT WILD BIRDS"					
	II.6 the end product was stored in enclosed storage;					
	(2) [II.7 the processed animal protein or product described above contains or is derived from animal-by products of ruminant origin and:					
	<ul> <li>(2) either [originates from a country or region, which is classified a Decision 2007/453/EC, and in which there has been no indigenous BSE</li> <li>(2) or [originates from a country or region classified as posing a 2007/453/EC in which there has been an indigenous BSE case, and the from animals born after the date from which the ban on the feeding of derived from ruminants, as defined in the OIE Terrestrial Animal Health or region, and]</li> <li>(2) either [is derived from other ruminants than bovine, ovine or caprological or [is derived from bovine, ovine or caprine animals and does not 2) either [bovine, ovine and caprine materials other than the and slaughtered in a country or region classified as posing 2007/453/EC.]</li> <li>(2) or [(a) specified risk material as defined in point 1 of Annex Parliament and of the Council (4); <ul> <li>(b) mechanically separated meat obtained from bones of those animals that were born, continuously reared and slau a negligible BSE risk in accordance with Commission Decision.</li> </ul> </li> </ul>	e case, and]] negligible BSE risk in accordance with Decision e animal by-product or derived product were derived fruminants with meat-and-bone meal and greaves Code, has been effectively enforced in that country ine animals.] contain and is not derived from: ose derived from animals born, continuously reared a negligible BSE risk in accordance with Decision of V to Regulation (EC) No 999/2001 of the European bovine, ovine or caprine animals, except from aghtered in a country or region classified as posing				
	or [is derived from bovine, ovine or caprine animals and does not or (2) either [bovine, ovine and caprine materials other than the and slaughtered in a country or region classified as posing 2007/453/EC.] or (2) or [(a) specified risk material as defined in point 1 of Annex Parliament and of the Council (4); (b) mechanically separated meat obtained from bones of those animals that were born, continuously reared and slau	contain and is not derived from: ose derived from animals born, continuo a negligible BSE risk in accordance wi  V to Regulation (EC) No 999/2001 of th bovine, ovine or caprine animals, except ightered in a country or region classified				

(c) animal by-product or derived product obtained from bovine, ovine or caprine animals which have been killed, after stunning, by laceration of the central nervous tissue by means of an elongated rod-shaped instrument introduced into the cranial cavity, or by means of gas injected into the cranial cavity, except for those animals that were born, continuously reared and slaughtered in a country or region classified as posing a negligible BSE risk in accordance with Decision 2007/453/EC]]].

- II.8 the processed animal protein or product described above:
  - (2) either [does not contain milk or milk products of ovine or caprine animal origin or is not intended for feed for farmed animals, other than fur animals.]
  - (2) or [contains milk or milk products of ovine or caprine animal origin and is intended for feed for farmed animals, other than fur animals, and the milk or milk products:
    - (a) are derived from ovine and caprine animals which have been kept continuously since birth in a country where the following conditions are fulfilled:
      - (i) classical scrapie is compulsorily notifiable;
      - (ii) an awareness, surveillance and monitoring system is in place for classical scrapie;
      - (iii) official restrictions apply to holdings of ovine or caprine animals in the case of a suspicion of TSE or the confirmation of classical scrapie;
      - (iv) ovine and caprine animals affected with classical scrapie are killed and destroyed:
      - (v) the feeding to ovine and caprine animals of meat-and-bone meal or greaves, as defined in the Terrestrial Animal Health Code of the World Organisation for Animal Health (OIE), of ruminant origin has been banned and effectively enforced in the whole country for a period of at least the preceding seven years;
    - (b) originate from holdings where no official restrictions are imposed due to a suspicion of TSE;
    - (c) originate from holdings where no case of classical scrapie has been diagnosed during a period of at least the preceding seven years or, following the confirmation of a case of classical scrapie:
      - (2) either [all ovine and caprine animals on the holding have been killed and destroyed or slaughtered, except for breeding rams of the ARR/ARR genotype, breeding ewes carrying at least one ARR allele and no VRQ allele and other ovine animals carrying at least one ARR allele:]
      - o (2) or [all animals in which classical scrapie was confirmed have been killed and destroyed, and the holding has been subjected for a period of at least two years since the date of confirmation of the last classical scrapie case to intensified TSE monitoring, including testing with negative results for the presence of TSE in accordance with the laboratory methods set out in point 3.2 of Chapter C of Annex X to Regulation (EC) No 999/2001, of all of the following animals which are over the age of 18 months, except ovine animals of the ARR/ARR genotype:
        - animals which have been slaughtered for human consumption; and
        - animals which have died or been killed on the holding but which were not killed in the framework of a disease eradication campaign.]]
  - the processed animal protein or product described above contains or is derived from animal-by products of non-ruminant origin and is, according to the statement of the Consignor referred to in Box I.1, not intended for the production of feed for farmed animals, other than wild birds.
- II.10 have been preserved in such a way that they will not spoil between dispatch and delivery to the plant of destination.

Notes Part I:

11.9

Country: The name of the third country issuing the certificate.

- Box I.1. Consignor/Exporter: the name and address (street, city and region, province or state, as appropriate) of the natural or legal person dispatching the consignment that must be located in the third country.
- Box I.2. Certificate reference No: the unique mandatory code assigned by the competent authority of the third country in accordance with its own classification.
- Box I.3. Central competent authority: name of the central authority in the third country issuing the certificate.
- Box I.4. Local competent authority: if applicable, the name of the local authority in the third country issuing the certificate.
- Box I.5. Consignee/Importer: name and address of the natural or legal person to whom the consignment is intended in the Member State.
- Box I.6. Operator responsible for the consignment in Ireland:

The name and address of the person in Ireland in charge of the consignment when presented to the BCP and who makes the necessary declarations to the competent authorities either as the importer or on behalf of the importer.

- Box I.7. Country of origin: the name and ISO code of the country where the goods were produced, manufactured and packaged (labelled with the identification mark). Import is permitted only from countries of origin which are listed in Part 1 of Annex II to Regulation (EU) No 206/2010 (OJ L 73, 20.3.2010, p. 1–121).
- Box I.10. Place of dispatch: the name, address and approval number of the establishments of production of processed terrestrial invertebrates from which the products come from.

Import is permitted only if processed terrestrial invertebrates were produced in establishments, as defined by art.24(1)(a) of Regulation (EC) 1069/2009, which are approved by the Competent authority of the Third Country and listed in the European Commission webpage at the following link: <a href="https://ec.europa.eu/food/safety/international\_affairs/trade/non-eu-countries\_en">https://ec.europa.eu/food/safety/international\_affairs/trade/non-eu-countries\_en</a>

- Box I.11. Place of loading: the name of the city and category (for example, establishment, holding, port or airport) of the final place where the products are to be loaded in the means of transport for the journey to Ireland. In the case of a container, state where it is to be placed aboard the final means of transport to Ireland. In the case of a ferry, indicate the place where the truck embarked.
- Box I.12. Place of destination: the place in Ireland where the animals or products are sent for final unloading. Give the name, address and approval number of the holdings or establishments of the place of destination.

## II. Health Information

II.a. Certificate reference No.

Box I.13. Date and time of departure: the date when the means of transport departs (aeroplane or vessel).

Box I.14 Means of transport: means of transport leaving the country of dispatch.

Identification of the means of transport: for aeroplanes the flight number, for vessels the ship name(s).

In the case of a ferry, state the identification of the road vehicle, the registration number plate with trailer number plate if applicable, and the name of the scheduled ferry.

Box I.15. Entry BCP in Ireland: state the name of the Border Control Post.

Box I.16. Accompanying documents: The type and reference number of the commercial documents (for example, the airway bill number, the bill of lading number, etc).

Box I.17. Container No/Seal No: if applicable, the corresponding numbers.

The container number must be provided if the goods are transported in closed containers.

Only the official seal number must be stated. An official seal applies if a seal is affixed to the container or truck or other storage transportation recipient under the supervision of the competent authority issuing the certificate.

Box I.18 and Box I.20. Total net weight: this is defined as the mass in kilograms of the goods themselves without immediate containers or any packaging.

Total gross weight: overall weight in kilograms. This is defined as the aggregate mass of the products and of the immediate containers and all their packaging, but excluding transport containers and other transport equipment.

Box I.22. Identification of the commodities: use the appropriate HS code: 05.11, 23.01 or 23.09.

Species: insects, specify its scientific name as is it described in point II.2(b)

## Part II

(1a) OJ L 300, 14.11.2009, p. 1.

- (1b) OJ L 54, 26.2.2011, p. 1.
- (2) Delete as appropriate.
- (3) Where:
- n = number of samples to be tested;

m = threshold value for the number of bacteria; the result is considered satisfactory if the number of bacteria in all samples does not exceed m;

M = maximum value for the number of bacteria; the result is considered unsatisfactory if the number of bacteria in one or more samples is M or more; and

c = number of samples the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other samples is m or less.

- (4) OJ L 147, 31.5.2001, p. 1.
- (5) OJ L 172 30.6.2007, p. 84.
- The signature and the stamp must be in a different colour to that of the printing.
- Note for the operator responsible for the consignment in Ireland: This certificate is only for veterinary purposes and must accompany the consignment until it reaches the border control post.
