

## **APPLICANT'S RESPONSE TO THE CONSOLIDATED OBSERVATIONS**

I have read and understood the observations made related to my application for seaweed harvesting. I accept all observations and will fully comply with all observations.

With reference to the observations by the Dept of Agriculture, Food and Marine I have contacted the Directors of The Tralee Bay Oyster Society to inform them of our intentions and to establish if they have any objections. I have included below their written response stating that they have no objections.

Following your email on Thursday last and our telephone conversation on Friday, I have contacted our directors and they do not have any problem with your seaweed licence application.

Therefore Tralee Oyster Fisheries Society Ltd is happy for your application to proceed and good luck with the project.
