Herdowners who dispose of BVD positive animals are eligible to apply for financial supports.
8. **Legal basis:** The legal basis under which data is being collected/processed is the Bovine Viral Diarrhoea Regulations 2017 (S.I. No. 30 of 2017); and subsequent amendments: S.I. No.170 of 2018, and S.I. No. 182 of 2020.

These are recorded by ICBF and recorded against the animal ID and association information from AIM (Animal Identification and Movement). The result of the test is communicated by ICBF to the herdowner (usually by SMS when the number is provided). The results are then transmitted to AHCS (Animal Health Computer System) by ICBF. AHI (Animal Health Ireland) can access herd/animal level details using a dashboard system on ICBF. Farmers and, in cases where a consent form has been signed, an authorised PVP may also access your herds dashboard. Your test data will be stored on the Department's AHCS
10. **Retention Period:** The data collected for this purpose will be held by the Department only as long as there is a business need to do so in line with the purpose(s) for which it was collected. After this time it will be marked for destruction and will be destroyed in line with internal guidelines or guidelines for destruction received from the National Archives Office or associated permissions received from them.

This means that the systems in this Department may automatically process information received for validation reasons
13. **Information from Third Party:** Your personal data in relation to BVD test results was obtained from ICBF in line with this Department's requirement to have BVD test results. In circumstances where this Department did not gather your personal data you are still entitled to exercise your rights in relation to this personal data and the details on how to exercise individuals' rights are detailed above.
