**Subject:** RE: ADCP deployments in Kerry

Morning [REDACTED],

Please see below in relation to Valentia ADCP deployment. From what I understand, Techworks are currently carrying this work out on behalf of Irish Water but I will seek clarification on this moving forward.

This email is regarding the Foreshore License Application for the Valentia ADCP surveys as submitted by Techworks Marine on behalf of Irish Water.

Irish Water have carried out an ecological review of the potential impacts of the proposed activities following the concerns raised by the Foreshore unit regarding *Edwardsia delapiae* and its habitat.

The outcome of this review is that there are likely to be residual risks to the habitats/species that cannot easily be mitigated/managed.

Accordingly Irish Water formally request to remove ADCP 3 and ADCP 4 from the foreshore license application to remove any risk to these habitats/species.

Kind Regards,

[REDACTED]
