### **Part 1: Proposal Details (Attach additional documents as required)**

<b>1.1</b>	<p><b>Description of proposed works/activity.</b></p> <p>The proposed Celtic Interconnector, which is the subject of this Foreshore Licence Application, involves the pre-lay installation works, cable installation works, operation, and periodic maintenance of a submarine electricity interconnector between Ireland and France. The interconnector will include a fibre optic link to enable communication and operational control of the interconnector, with the potential for some fibres to also be used for commercial use.</p> <p>The Celtic Interconnector comprises:</p> <ul style="list-style-type: none"> <li>• Two high voltage direct current (HVDC) electricity power cables;</li> <li>• A smaller fibre optic link for control and communication purposes;</li> <li>• All associated works (and work sites) required to construct, install, test, and commission the cables; and</li> <li>• All associated works (and work sites) required to operate, maintain, repair, and decommission the cables, including 2 repair events over the approximately 40-year lifetime of the Project.</li> </ul> <p>The Celtic Interconnector Project is approximately 500km long (approximately 35km in Irish Territorial Waters) and generally 500m wide between Claycastle Beach, County Cork and the 12nm limit. A small part of this width will be required for installation (approximately 10-20m) once the detailed design of the cable corridor route is finalised. It is proposed to finalise the precise position of the submarine cables within the 500m wide corridor after permits are granted, but before installation has commenced. This will allow for optimisation of the final laid submarine cables to minimise engineering and environmental challenges.</p>
------------	---

	<p>The two HVDC cables and the fibre optic link will be buried within pre-installed carbon steel / HDPE conduits beneath the beach and car park at Claycastle Beach with the HVDC cables entering the two underground concrete transition joint bay chambers, located on the landward side of the 25" Historic Mean High Water Mark. The conduits will be installed at 5m spacing between centres and will extend from the transition joint bay (located shore side of the Claycastle Beach car park) to approximately 150m into the intertidal zone. The conduit cable entry point is located within the intertidal zone, approximately 50m shoreside of Lowest Astronomical Tide.</p> <p>Consideration of the potential need to detonate unexploded ordnance (UXO) target has been included, although it is noted that previous magnetometer surveys have identified a low risk of encountering such targets.</p> <p>An Environmental Impact Assessment Report (EIAR) and a Natura Impact Statement (NIS) (which includes a Screening Report) have been prepared in respect of this application and accompany this application. The Celtic Interconnector project is expected to commence on-site construction in 2023 and be fully operational in 2027.</p> <p>Full project details are provided in <b>Volume 3D2 Chapter 5: Description of the Landfall</b>, and <b>Chapter 6: Description of the Offshore Cable of the Ireland Offshore EIAR</b>.</p>
1.2	<p><b>Describe the nature and scale of any structure to be erected on the foreshore. Is the structure proposed to be temporary or permanent?</b></p> <p>The Celtic Interconnector comprises the installation of two high voltage direct current power cables and a fibre optic link under the seabed.</p> <p>Two optional construction methods for the landfall are proposed to ensure that the worst case scenario has been assessed from an environmental perspective. Option 1 results in an increased level of construction and environmental impact and Option 2 resulting in reduced environmental impact, but greater potential for disturbance of the beach area.</p> <p>Both options are assessed within the EIAR and the NIS, with Option 1 noted as being generally representative of the worst case scenario. In Option 1 a trench will be excavated across Claycastle Beach using land-based equipment (such as long arm excavators) with the aid of a temporary sheet piled cofferdam and an adjacent temporary causeway for access. The trench will be backfilled, and site reinstated to its original condition following installation. In Option 2, conduits would be installed below the carpark, extending only a short distance below the beach, thus reducing the construction effort, with no requirement for a causeway. However, it would result in a short duration exclusion zone and detours on the beach during cable installation.</p> <p>The temporary cofferdam will be required to achieve the required depth of lowering and prevent the ingress of seawater and sediments. The steel sheet-piles will be installed using a piling rig comprising of hydraulic vibratory hammers. The piling rig will typically work from the beach outward, using the temporary causeway as an access route. The cofferdam will be approximately 130m long and formed from two lines of sheet piles installed parallel to the centreline of the conduits. With the conduits installed at 5m spacing between centres, a 14m wide cofferdam is conservatively assumed to be sufficient. (Note, for Option 2, the</p>

	<p>cofferdam is unlikely to be required, but if necessary for installation, could be up to 5m in length).</p> <p>The cofferdam will be installed from a temporary causeway constructed adjacent to the cofferdam. It is assumed that the causeway will also be enclosed by sheet piles on all shore facing sides to prevent the ingress of seawater and sediments, particularly at high tides. The causeway will be of sufficient width to allow heavy land-based equipment to manoeuvre during trench excavation and conduit installation. An 8.0m wide causeway (6,000m<sup>3</sup>) is assumed to be sufficient. The temporary causeway shall be constructed from aggregate material to provide sufficient strength to support excavating equipment.</p> <p>Land take of approximately 3,360m<sup>2</sup> is required along the beach, the car park, and the section of grass which separates the car park from the year-round holiday park. Land take of approximately 2,860m<sup>2</sup> is also required into the intertidal zone for installation of the sheet pile cofferdam and temporary causeway.</p> <p>Temporary presence of vessels, including jack-up barge, associated with preparation of the seabed, cable installation, repair, and maintenance and eventual decommissioning.</p> <p>Rock placement as a means of primary cable protection is not envisaged along the cable route in Irish Territorial Waters. However, some contingency is made for secondary rock protection that may be required where the target depth of lay is not fully achieved. The level of secondary rock protection shall be minimised as much as possible through the best endeavours of the installation contractor to achieve the required level of protection through burial. Should external cable protection be required in Irish Territorial Waters, then an allowance has been made for between 0km and 3km in the worst case scenario (or 0t to 10t). The allowance for rock protection in the Irish EEZ is between 0km and 30km in the worst case, or 0t to 80t.</p> <p>Contingency for permanent deposits associated with 2 discrete cable repair works over the lifetime of the Proposed Development, should they be required.</p> <p>A detailed project description of the Proposed Development is provided in <b>Volume 3D2 Chapter 5: Description of the Landfall, and Chapter 6: Description of the Offshore Cable</b> of the appended <b>Environmental Impact Assessment Report (EIAR)</b>.</p>
1.3	<p><b>Indicative timing of the works/activity: (i) Start date (ii) Duration (iii) Any other information relevant to timing.</b></p> <p>Surveying and testing within the foreshore area are expected to begin during 2023, as part of development of detailed design works.</p> <p>The installation sequence would be completed in the winter months, i.e. October 2024 to April 2025, to avoid the bathing season at Claycastle Beach and involves the installation of pre-installed conduits within a trench excavated across the beach. The estimated duration for these works is anticipated to be approximately 10 weeks and is detailed as follows:</p> <ul style="list-style-type: none"> <li>• Mobilisation / Site Preparation – 1 week.</li> <li>• Landfall Civil Works – 4 weeks.</li> <li>• Conduit stringing and Installation – 3 weeks.</li> <li>• Backfilling and Site Reinstatement – 2 weeks.</li> </ul>

	<p>This activity is expected to coincide with the installation of the Transition Joint Bay, which is further detailed in <b>Volume 3C Chapter 2: Description of Onshore Development and Chapter 3: Onshore Construction Phase Activates</b></p> <p>The durations of the works provided above are indicative only and based on a work week Monday to Friday 7am to 7pm and Saturday from 7am to 2pm, however, this will more than likely have to co-inside with conditions of planning associated with the SID consent application. Safety requirements for the installation operations / procedures and weather condition may ultimately also dictate the final programme.</p> <p>The second phase of the installation sequence would take place in the summer months, subject to approval from the relevant authorities, i.e. April 2025 to September 2025, to coincide with favourable weather windows for offshore cable installation. The cable may be laid away from or towards the Irish shore. Schedule certainty shall be subject to progress rates from offshore cable installation if the cable is laid towards shore. There would be greater certainty should the offshore cable installation commence in Ireland and be away from shore. The estimated overall duration for phase two is anticipated to take approximately 4 weeks, detailed as follows:</p> <ul style="list-style-type: none"> <li>• Mobilisation / Site Preparation / Winch Setup – 1 week.</li> <li>• Cable Pull (total) – 1 week (note that this may be undertaken in three separate work periods, totalling 1 week).</li> <li>• Cable Jointing Activities / Site Reinstatement – 2 weeks.</li> </ul> <p>The durations of the works provided above are indicative only and based on a work week Monday to Friday 7am to 7pm and Saturday from 7am to 2pm. The duration of certain works could be shortened by shift-work seven days a week, 24 hours a day. Safety requirements for the installation operations / procedures and weather condition may ultimately dictate the final programme.</p> <p>The anticipated lifespan of the Celtic Interconnector is approximately 40 years.</p> <p>Full details of the project programme are provided in <b>Volume 3D2 Chapter 1: Description of the Landfall, and Chapter 2: Description of the Offshore Cable</b> of the appended <b>Environmental Impact Assessment Report (EIAR)</b>.</p> <p>Timings described here are indicative, and will be confirmed post-consent by the contractor as part of the detailed design phase.</p>

1.5	<p><b>Do the proposed works provide for public use, commercial use, restricted use or strictly private use? Provide Details</b></p>																

	<p>The Celtic Interconnector will have key strategic importance providing significant additional interconnection between County Cork on the south coast of Ireland and the coast of Brittany in North West France (Nord-Finistère), and onwards into mainland Europe. It will provide additional transmission network capacities, reinforcing the existing electricity grids in southern Ireland and North West France and contributing to each country's strategic interconnection objectives. The development and construction of Celtic Interconnector will deliver increased security of supply, fuel diversity, greater competition, and ultimately provide significant benefits to consumers in Ireland, France, and mainland Europe. Celtic Interconnector is designated as a European Union Project of Common Interest (PCI project number PCI0003) under the provisions of European Union Regulation No. 347/2013 on guidelines for Trans-European Network for Energy (TEN-E Regulations), and a designated e-Highway 2050 project.</p>
<b>1.6</b>	<p><b>Might the proposed works restrict public use/enjoyment of the foreshore? Provide details.</b></p> <p>Yes. There will be restricted access to Claycastle Beach and the foreshore during the construction of the three cable conduits within the cofferdam prior to backfilling and reinstatement. Land take is required for this stage of the works, along the beach, the car park, and the section of grass which separates the car park from the year-round holiday park. The programme of works across the beach is expected to take approximately 10 weeks of activity conducted between October 2024 and April 2025.</p> <p>Full details of the project are provided in <b>Volume 3D2, Chapter 5: Description of the Landfall, and Chapter 6: Description of the Offshore Cable</b> of the appended <b>Environmental Impact Assessment Report (EIAR)</b>, with a detailed assessment of potential effects from a population, human health, and socioeconomics perspective provided in <b>Volume 3D2, Chapter 8: Population and Human Health</b> of the <b>EIAR</b>.</p> <p>In summary, it was concluded that the only potential impact of significance was disturbance to beach users during the construction phase; all other potential impacts identified were considered to be negligible and therefore not significant.</p>
<b>1.7</b>	<p><b>Has the applicant held or does the applicant hold any previous Foreshore Licences, Leases or applications over the area sought or over any other area including pending applications? (Give details including Department's file reference number(s)).</b></p> <p>Yes. Celtic Interconnector has the following licences for marine survey activities associated with the project:  Ref: FS 006243 Foreshore Licence for Geophysical Marine Survey Works  Ref: FS 006446 Foreshore Licence for Geotechnical and Environmental Marine Survey Works  Ref: FS 006722 Foreshore Licence for Geophysical Marine Survey Works  Ref: FS 006811 Foreshore Licence for Geotechnical and Environmental Marine Survey Works</p>

1.10	<p><b>Employment Implications (if any)</b>  Celtic Interconnector will be engaging contractors to construct the Proposed Development. It is estimated that the contractor will employ persons during construction in a range of activities, both onshore and offshore. No permanent jobs during operation are anticipated as a result of the subsea cable.</p>

**Volume 8A: Planning and Consultation Report** includes an account of engagement undertaken with the Foreshore Unit and other statutory and non-statutory consultees as part of the Foreshore Licence application process.

A summary of the form of engagement and the responses received from the above-named bodies is presented in **Table 3-4** of the **Planning and Consultation Report**, and outlined below:

- **National Parks & Wildlife Service (NPWS)** - EirGrid issued a project consultation letter on 26 November 2020. A response was received on 8 January 2021 (see **Planning and Consultation Report Volume 8A**). The issues raised within this consultation response have been incorporated as appropriate into the appended EIAR.
- **National Monuments Service (NMS)** - EirGrid issued a project consultation letter on 26 November 2020. A response was received on 8 January 2021 (see **Planning and Consultation Report Volume 8A**). The issues raised within this consultation response have been incorporated as appropriate into the appended EIAR.
- **Inland Fisheries Ireland** - EirGrid issued a project consultation letter on 26 November 2020. IFI confirmed that they would assess the details of the project at the application stage (see **Planning and Consultation Report Volume 8A**).
- **Sea Fisheries Protection Authority** - EirGrid issued a project consultation letter on 25 November 2020. No response has been received to date.
- **Marine Institute** - EirGrid issued a project consultation letter on 26 November 2020. A response was received on 3 February 2021 (see **Planning and Consultation Report Volume 8A**). The issues raised within this consultation response have been incorporated as appropriate into the appended EIAR.
- **Marine Survey Office** - EIAR Scoping Report email response circulated by Foreshore Unit on 22 December 2020 (see **Planning and Consultation Report Volume 8A**).

The Report sets out how EirGrid has had regard to the comments received in the development of the application, and copies of correspondence are included in the supporting appendices.

Additionally, EirGrid has carried out an extensive programme of public and landowner consultation for the onshore elements of the Celtic Interconnector project. EirGrid has prepared **Volume 2B Public and Landowner Consultation Report** (a copy of which is provided as **Appendix C** to this application) to accompany an application for planning approval to An Bord Pleanála. The Report has been prepared to support the Strategic Infrastructure Development (SID) planning application and the Project of Common Interest (PCI) file. Both the SID planning application and the PCI file are available to all members of the public from the time that these consenting files are submitted to the relevant authorities to the time that a final decision is made in relation to the proposed development.

The **Volume 2B Public and Landowner Consultation Report** documents the extent and nature of public and landowner consultation and participation that has taken place in Ireland over the course of the project's development. The report shows that EirGrid has endeavoured to ensure the widest possible access by the public and landowners to information about the project at all stages of its pre-planning development. In this regard, it is considered that the consultation

	<p>undertaken in respect of the Celtic Interconnector fully meets the requirements of the Aarhus Convention, Codified EIA Directive, and Irish national legislation. The <b>Volume 2B Public and Landowner Consultation Report</b> is included as part of the Foreshore Licence application.</p>
4.2	<p><b>Describe briefly any consultations undertaken with other relevant authorities (e.g. Local Authority, Port/Harbour authority etc) or State Agencies.</b></p> <p>Wood Plc has prepared a <b>Planning and Consultation Report</b> for the Ireland offshore section of the Celtic Interconnector project, which is provided in <b>Volume 8A</b> of the appended <b>EIAR</b>. The Report provides a summary of the engagement and consultation carried out to support the development of the Foreshore Licence Application. This includes EirGrid's engagement with statutory and non-statutory consultees as part of the Foreshore Licence application process.</p> <p>A summary of the form of engagement and the responses received from other relevant authorities is presented in <b>Table 3.4</b> of the <b>Planning and Consultation Report</b>. The most recent direct interaction with stakeholders included the issuing of project consultation letters in November 2020, and following-up on responses as received.</p> <p>Responses to the project consultation letters, and subsequent additional consultation, were received from:</p> <ul style="list-style-type: none"> <li>• An Taisce (National Trust for Ireland);</li> <li>• Commission for Regulation of Utilities;</li> <li>• Cork County Council (a series of meetings has also been held with Cork County Council representatives);</li> <li>• Department of Defence;</li> <li>• Department of Communications, Climate Action and Environment (DCCA);</li> <li>• Department of the Environment, Energy and Communications (DECC);</li> <li>• DP Energy;</li> <li>• Environmental Protection Agency (EPA);</li> <li>• Health Service Executive;</li> <li>• Heritage Council;</li> <li>• Inland Fisheries Ireland (IFI);</li> <li>• Irish Whale and Dolphin Group (IWDG);</li> <li>• Marine Safety Policy Division;</li> <li>• Minister for Agriculture, Food and the Marine;</li> <li>• Minister for Culture, Heritage and the Gaeltacht (DCHG);</li> <li>• National Monuments Service;</li> <li>• National Parks and Wildlife Service; and</li> <li>• Nature Conservation Unit, DHLGH.</li> </ul> <p>Additionally, EirGrid has carried out an extensive programme of public and landowner consultation for the onshore elements of the Celtic Interconnector project. EirGrid has therefore prepared <b>Volume 2B Public and Landowner Consultation Report</b> (a copy of which is provided with this application) to accompany an application for planning approval to An Bord Pleanála.</p>
4.3	<p><b>Describe any consultations undertaken to date with other foreshore users.</b></p>

	<p>As a proponent of a European PCI project, EirGrid is required to conduct public and stakeholder consultation meetings through a variety of means set out in Annex IV(5) of the PCI Regulation. Public consultation was achieved through:</p> <ul style="list-style-type: none"> <li>• Regular updates to the Project website (<a href="http://www.eirgridgroup.com/the-grid/projects/celtic-interconnector/whats-happening-now/">www.eirgridgroup.com/the-grid/projects/celtic-interconnector/whats-happening-now/</a>).</li> <li>• Public consultation meetings.</li> <li>• Newspaper notices published in both local and national newspapers.</li> <li>• Provision of public information brochure (Celtic Interconnector Connecting the Grids of Ireland and France) – published before the start of formal public consultation and updated throughout the development process.</li> </ul> <p>EirGrid has held a number of Public engagement and consultation exercises during Step 1 to 4 of EirGrid's six step grid development process. Step 4 (Where exactly should we build) commenced in November 2019 and continued to Spring. This included the publication of information on the project pages of EirGrid's website, and the holding of seven Open Evenings for communities in the East Cork project area. A record of the comments received during this consultation was published in a Step 4 Consultation Report in May 2020. Due to COVID-19 restrictions, no further events/stakeholder meetings were held in person, but EirGrid maintained contact with stakeholders through publication of newspaper adverts and social media. Online meetings were held with community organisations and councils on request, and online information webinars were held. Full details can be found in the <b>Volume 2B Public and Landowner Consultation Report</b>.</p> <p><b>Volume 8A Planning and Consultation Report</b> also provides a record of engagement with bodies representing foreshore users (see Table 3.4 in <b>Volume 8A</b>).</p>
4.4	<p><b>Describe any likely interactions with activities of the public or other foreshore users during the construction and operational phases of the works/activities (e.g. fishing, aquaculture, sailing, and surfing swimming, walking). Describe any measures proposed to minimise inconvenience to other users.</b></p> <p>There is the potential that beach works, and nearshore works will affect recreational users of the Claycastle Beach through the presence of cable installation works and from a visual disturbance perspective. Access to the Claycastle Beach car park and sections of the beach will be restricted during the installation works which may affect beach users and those participating in water sports.</p> <p>Fishing activity and recreational boating will be affected by temporary exclusion zones around the cable installation vessels. Effects are assessed in full in <b>Volume 3D2</b> of the appended <b>EIAR, Chapter 8: Population and Human Health, Chapter 18: Shipping and Navigation, and Chapter 19: Commercial Fisheries</b>.</p> <p>All the project specific mitigation to be implemented by the Celtic Interconnector project is outlined in a <b>Summary of Monitoring and Mitigation Measures</b> provided in <b>Volume 3D2</b> of the appended <b>EIAR, Chapter 21</b>. This includes the continued use of a Fisheries Liaison Officer (FLO) (appointed during the cable route surveys).</p>
4.5	

	<p><b>Have adjacent landowners, whose properties may be affected by these works been consulted? Please provide details/permissions as appropriate.</b></p> <p>Adjacent landowners have been consulted directly and through the consultation and engagement process detailed in Sections 4.1, 4.2, and 4.3 above.</p>

5.4	<p><b>Describe any other projects or plans for the area, anticipated or developed, that in combination with this proposal, may have a significant effect on a Natura 2000 site: Please list with planning reference numbers (where available).</b></p> <p>The NIS has identified that there are no other projects or plans for the area, anticipated, or developed, that in combination with the Proposed Development, may have a significant effect on a Natura 2000 site. This has included consideration of potential in combination effects with the wider Celtic Interconnector Project in Ireland (i.e. the onshore elements). The justification for this conclusion is provided below.</p> <p>The Offshore Renewable Energy Development Plan (OREDPP) published in 2019 (OREDPP 2019) has identified the need for sustainable development of offshore wind and tidal energy and examines three different scenarios for delivery of increasing amounts of offshore energy. Whilst this plan does not provide locations of potential sites it does consider the potential capacity of regional marine and coastal areas and further considers potential cumulative impacts with other existing projects in Irish Waters. Through a Strategic Environmental Assessment (SEA) and associated screening for impacts on environmental receptors (including fish, shellfish, marine mammals, seabirds and marine reptiles) and European Sites an assessment has been made by the Department of the Environment, Climate and Communications with regard to the potential impacts of a significant increase in offshore development in Irish waters.</p> <p>Results of the SEA conclude that whilst there is potential to achieve the "higher level scenario" presented in the OREDPP without significant adverse effects on the environment, this is only achieved with the inclusion of mitigation measures embedded into the planning and design phases to ensure sustainable development. As highlighted in the NIS that accompanies the OREDPP, a number of European sites and species could be impacted by the levels of offshore development proposed by the plan. However, the assessment highlights the need for further investigative work at an individual project level to adequately assess these impacts and highlights the need for developers to "comprehensively demonstrate at the project level that there would be no LSE on the integrity and conservation of objectives of a Natura Site". It further states that where developers are "unable to demonstrate that there would be no LSE developments would not be permitted unless IROPI was demonstrated". These requirements would therefore be built into any developments brought forward ensuring that where possible offshore developments minimise or avoid impacts on European sites and the species they support.</p>				✓	✓

	<p>However, given the time that would be needed to develop the hypothetical capacity proposed in OREDP there would be no temporal overlap with the Celtic Interconnector Project and therefore no in combination effects on European Sites.</p> <p>Furthermore, given the temporary nature of the construction effects associated with the Celtic Interconnector; it is considered that effects would not occur in combination with other, already operational offshore developments.</p> <p>Full details are provided in the appended <b>Volume 6B Natura Impact Statement including Screening Report.</b></p>

If yes, please specify.</b></p> <p>Within the Proposed Development there are no designated prehistoric archaeological sites and no known prehistoric sites. There are no wrecks within the cable study corridor and wider study area. Analysis of the marine geophysical data identified 13 anomalies; although none were identified as having high archaeological potential.</p> <p>For information on marine archaeology please see <b>Volume 3D2</b> of the <b>EIAR, Chapter 16 Archaeology and Cultural Heritage</b> and accompanying <b>Appendices</b>.</p>	✓		✓

5.12	<p><b>Will the proposal have any potential impacts on the archaeological integrity of the site? There is however a limited potential for inadvertent disturbance of remains that have not yet been identified during installation of cabling and installation of cable protection.</p> <p>Therefore, it is anticipated that the Celtic Interconnector Project will not have a significant effect on the archaeology and cultural heritage within the area following the application of the proposed mitigation measures. Please see <b>Volume 3D2</b> of the <b>EIAR, Chapter 15 Archaeology and Cultural Heritage</b> and accompanying <b>Appendices</b>.</p>		✓	✓
5.13	<p><b>Are you proposing any measures to mitigate potential archaeological impacts? 	<p>Archaeological exclusion zones will be established around the sites of known and potential wrecks. These exclusion zones would be 100m from the recorded location or location of any high potential sites, and 50m from the location of any medium potential sites and would be used to minimise the potential for disturbance of wreck sites.</p> <p>Please see <b>Volume 3D2</b> of the appended <b>EIAR, Chapter 15 Archaeology and Cultural Heritage</b>.</p>

<b>6.2</b>	<p><b>What marine activity is there in the area?</b></p> <p>There are a number of navigation features near the Proposed Development associated with harbour, anchoring areas, disposal grounds, existing subsea cables, navigation lines and traffic separation zones, all of which are charted to aid navigation.</p> <p>For further details please see <b>Volume 3D2</b> of the <b>EIAR, Chapter 18 Shipping and Navigation</b>.</p>			✓
<b>6.3</b>	<p><b>How will the marine activity be affected by the proposed works?</b></p> <p>The potential effects considered by the EIAR included displacement of shipping from area surrounding Project vessels; change in water depth (associated with external cable protection, if required); and presence of cables within anchor burial depth of the seabed, imposing restrictions on where vessels may anchor.</p> <p>Please see <b>Volume 3D2</b> of the <b>EIAR, Chapter 18 Shipping and Navigation</b>.</p>			✓
<b>6.4</b>	<p><b>What mitigating measures will be put in place?</b></p> <p>During the construction phase, the key to vessel safety is compliance by both work and passing vessels with the COLREGS. This will be achieved through:</p> <ul style="list-style-type: none"> <li>• issue of Marine Notices;</li> <li>• radio navigational warnings by local ports and coastguard;</li> <li>• radio communication between work vessels and passing vessels;</li> <li>• direct contact with local commercial fishing organisations;</li> <li>• direct contact with clubs representing local recreational boat users; and</li> <li>• notices on the beach regarding landfall works and launching of personal watercraft or kite surf boards.</li> </ul> <p>The cable contractor will monitor and maintain records of radio communications with passing craft and review these at intervals to ascertain whether any changes or improvements to information dissemination would be appropriate.</p> <p>The principal measure to minimise risks of adverse interaction between vessels and the cable during operation, is to ensure that information is supplied to appropriate authorities to enable marine charts and sailing directions to be updated to show the cable route.</p> <p>For a full list of mitigation please see <b>Volume 3D2</b> of the appended <b>EIAR, Chapter 18 Shipping and Navigation</b>.</p>

- (b) A poll demanded on the election of a Chairperson or on a question of adjournment shall be taken forthwith. A poll demanded on any other question shall be taken either forthwith or at such time (not being more than thirty days after the poll is demanded) and place as the chairperson of the meeting may direct. The demand for a poll shall not prevent the continuance of a meeting for the transaction of any business other than the question on which the poll was demanded. If a poll is demanded before the declaration of the result of a show of hands and the demand is duly withdrawn, the meeting shall continue as if the demand had not been made.
- (c) No notice need be given of a poll not taken forthwith if the time and place at which it is to be taken are announced at the meeting in respect of which it is demanded. In any other case at least seven clear days notice shall be given specifying the time and place at which the poll is to be taken.

22. **Votes of Members:** Votes may be given either personally or by proxy. 23. **Chairperson's Casting Vote:** Where there is an equality of votes, whether on a show of hands or on a poll, the chairperson of the meeting at which the show of hands takes place or at which the poll is demanded, shall be entitled to a casting vote in addition to any other vote he may have.

Evidence to the satisfaction of the Directors of the authority of the person claiming to exercise the right to vote shall be deposited at the Office or at such other place as is specified in accordance with these Articles for the deposit of instruments of proxy, not less than forty-eight hours before the time appointed for holding the meeting or adjourned meeting at which the right to vote is to be exercised and in default the right to vote shall not be exercisable.

25. **Default in Payment of Calls:** Unless the Directors otherwise determine, no member shall be entitled to vote at any general meeting either in person or by proxy, in respect of any share held by him unless all moneys presently payable by him in respect of that share have been paid.

26. **Time for Objection to Voting:** No objection shall be raised to the qualification of any voter except at the meeting or adjourned meeting at which the vote objected to is tendered, and every vote not disallowed at such meeting shall be valid. Any such objection made in due time shall be referred to the chairperson of the meeting whose decision shall be final and conclusive.
27. **Proxy Voting:** The instrument appointing a proxy shall be in writing in any usual form or in any other form which the Directors may approve and shall be executed by or on behalf of the appointor. The signature on such instrument need not be witnessed. A body corporate may execute a form of proxy under its common seal or under the hand of a duly authorised officer thereof. A proxy need not be a member of the Company. A member may appoint more than one proxy to attend on the same occasion.
28. **Deposit of Proxy Instruments:** The instrument appointing a proxy and any authority under which it is executed or a copy, certified notarially or in some other way approved by the Directors, shall be deposited, at the Office or (at the option of the member) at such other place or places (if any) as may be specified for that purpose in or by way of note to the notice convening the meeting, not less than forty-eight hours before the time appointed for the holding of the meeting or adjourned meeting or (in the case of a poll taken otherwise than at or on the same day as the meeting or adjourned meeting) for the taking of the poll at which it is to be used, and in default shall not be treated as valid. Provided that:-
- (a) in the case of a meeting which is adjourned to, or a poll which is to be taken on a date which is less than seven days after the date of the meeting which was adjourned or at which the poll was demanded, it shall be sufficient if the instrument of proxy and any such authority and certification thereof as aforesaid, is lodged with the Secretary at the commencement of the adjourned meeting or the taking of the poll; and
  - (b) an instrument of proxy relating to more than one meeting (including any adjournment thereof) having once been so delivered for the purposes of any meeting shall not require again to be delivered for the purposes of any subsequent meeting to which it relates.
29. **Effect of Proxy Instruments:** Deposit of an instrument of proxy in respect of a meeting shall not preclude a member from attending and voting at the meeting or at any adjournment thereof. The instrument appointing a proxy shall, unless the contrary is stated therein, be valid as well for any adjournment of the meeting as for the meeting to which it relates.
30. **Effect of Revocation of Proxy:** A vote given or poll demanded by proxy shall be valid notwithstanding the previous determination of the authority of the person voting or demanding a poll unless notice of the determination was received by the Company at the Office, or at such other place at which the instrument of proxy was duly deposited, before the commencement of the meeting or adjourned meeting at which the vote is given or the poll demanded or (in the case of a poll taken otherwise than on the same day as the meeting or adjourned meeting) the time appointed for taking the poll.

31. **Written Resolutions:** Subject to the provisions of the Act, a resolution in writing, executed by and on behalf of each member who would have been entitled to vote upon it if it had been proposed at a General Meeting at which he was present, shall be as effectual as if it had been passed in a general meeting duly convened and held and if described as a special resolution within the meaning of the Act shall be a special resolution.
