Part II : Certification

SPECIMEN

Part II : Certification	II. Health information		
	<p>II. Animal health attestation</p> <p>I, the undersigned official veterinarian, hereby certify that:</p> <p>II.1. The equine animals(1) of the consignment described in Part I:</p> <p>II.1.1. are intended for slaughter for human consumption and are not intended for slaughter in the framework of the eradication of a disease communicable to equine animals;</p> <p>II.1.2. have not shown signs or symptoms of diseases listed for equine animals in Commission Implementing Regulation (EU) 2018/1882 during the clinical examination carried out on _____ (insert date dd/mm/yyyy)(2), this being within the 48 hour period prior to departure</p> <p>(3) either <input type="radio"/> [from the registered establishment of origin in the country, territory or zone thereof of dispatch;]</p> <p>(3) or <input type="radio"/> [from the establishment approved for conducting assembly operations of equine animals by the competent authority in the country, territory or zone thereof of dispatch in accordance with requirements at least as stringent as those laid down in Article 5 of Commission Delegated Regulation (EU) 2019/2035;]</p> <p>II.1.3. meet the requirements attested in points II.2. to II.5. of this certificate, including in case of dispatch from an establishment approved for assembly operations;</p> <p>II.1.4. are accompanied by a written declaration, signed by the operator of the consignment of animals, which forms part of this certificate.</p> <p>II.2. Attestation on third country, territory or zone thereof and on establishment of dispatch</p> <p>II.2.1. The equine animals described in Part I are dispatched from _____ (insert name of country, territory or zone thereof), a country, territory or zone thereof, which on the date of issuing this certificate has the Code: _____ (4) and is assigned to Sanitary Group _____ (4).</p> <p>II.2.2. In the country or territory of dispatch the following diseases are compulsorily notifiable: African horse sickness, Venezuelan equine encephalomyelitis, infection with Burkholderia mallei (glanders), surra (Trypanosoma evansi), dourine (Trypanosoma equiperdum), equine infectious anaemia, infection with rabies virus and anthrax.</p> <p>II.2.3. The equine animals described in Part I are dispatched from a country, territory or zone thereof in which there has been no clinical, serological (in unvaccinated equine animals) or epidemiological evidence of African horse sickness during the 24 month period prior to the date of departure of the animals and there have been no systematic vaccinations against African horse sickness during the 12 month period prior to the date of departure.</p> <p>II.2.4. The equine animals described in Part I come from an establishment of origin situated in a country, territory or zone thereof in which</p> <p>(3) either <input type="radio"/> [infection with Burkholderia mallei (glanders) has not been reported during the 36 month period prior to the date of departure of the animals.]</p> <p>(3) or <input type="radio"/> [a surveillance and eradication programme for infection with Burkholderia mallei (glanders) recognised by the European Union(2) has been carried out during the 36 month period prior to the date of departure, and</p> <p>(3) either <input type="radio"/> [infection with Burkholderia mallei (glanders) has not been reported in the establishment of origin during the 36 month period prior to the date of departure of the animals.]]</p> <p>(3) or <input type="radio"/> [infection with Burkholderia mallei (glanders) has been reported in the establishment of origin during the 36 month period prior to the date of departure of the animals and following the last outbreak, the establishment has remained under movement restrictions</p> <p>(3) either <input type="radio"/> [until the remaining equine animals in the establishment have been subjected to a complement fixation test for infection with Burkholderia mallei (glanders)(5), carried out, with negative results at a serum dilution of 1 in 5, on samples taken at least 6 months after the infected animals have been killed and destroyed.]]]</p>		

Part II : Certification	II. Health information			
	(3)			or ◦ [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last equine animal on the establishment was killed and destroyed.]]]
		II.2.5.		The equine animals described in Part I come from an establishment of origin situated in a country, territory or zone thereof in which
	(3)			either ◦ [surra has not been reported during the 24 month period prior to the date of departure.]
	(3)			or ◦ [a surveillance and eradication programme for surra recognised by the European Union(2) has been carried out during the 24 month period prior to the date of departure of the animals, and
	(4)			either ◦ [surra has not been reported in the establishment of origin during the 24 month period prior to the date of departure of the animals.]]
	(3)			or ◦ [surra has been reported in the establishment of origin during the 24 month period prior to the date of departure of the animals, and following the last outbreak the establishment has remained under movement restrictions
	(3)			either ◦ [until the remaining animals in the establishment have been subjected to an enzyme-linked immunosorbent assay (ELISA) for trypanosomosis or card agglutination test for trypanosomosis (CATT) at a serum dilution of 1 in 4(5) carried out, with negative results, on samples taken at least 6 months after the last infected animal has been removed from the establishment.]]]
	(3)			or ◦ [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last animal of listed species on the establishment was either killed and destroyed or slaughtered.]]]
		II.2.6.		The equine animals described in Part I come from an establishment of origin situated in a country, territory or zone thereof in which
	(3)			either ◦ [dourine has not been reported during the 24 month period prior to the date of departure of the animals.]
	(3)			or ◦ [a surveillance and eradication programme for dourine recognised by the European Union(2) has been carried out during the 24 month period prior to the date of departure of the animals, and
	(3)			either ◦ [dourine has not been reported in the establishment of origin during the 24 month period prior to the date of departure of the animals.]]
	(3)			or ◦ [dourine has been reported in the establishment of origin during the 24 month period prior to the date of departure of the animals, and following the last outbreak, the establishment has remained under movement restrictions
	(3)			either ◦ [until the remaining equine animals in the establishment, except castrated male equine animals, have been subjected to a complement fixation test for dourine, carried out with negative results at a serum dilution of 1 in 5(5) on samples taken at least 6 months after the infected animals have been killed and destroyed or slaughtered, or the infected entire male equine animals have been castrated.]]]
(3)			or ◦ [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last equine animal on the establishment was either killed and destroyed or slaughtered.]]]	
	II.2.7.		The equine animals described in Part I come from an establishment of origin in which	
(3)			either ◦ [equine infectious anaemia has not been reported during the 12 month period prior to the date of departure of the animals.]	
(3)			or ◦ [equine infectious anaemia has been reported during the 12 month period prior to the date of departure of the animals and following the last outbreak the establishment has remained under movement restrictions	

Part II : Certification	II. Health information		
	<p>(3) either ○ [until the remaining equine animals in the establishment have been subjected to an agar gel immuno-diffusion test (AGID or Coggins test) or ELISA(5) for equine infectious anaemia carried out, with negative results, on samples taken on two occasions with a minimum interval of 90 days following cleaning and disinfection of the establishment after the infected animals have been killed and destroyed or slaughtered.]]</p> <p>(3) or ○ [for at least 30 days from the date of cleaning and disinfection of the establishment, after the last equine animal on the establishment was either killed and destroyed or slaughtered.]]</p> <p>II.2.8. The equine animals described in Part I come from an establishment of origin in which</p> <p>II.2.8.1. infection with rabies virus in kept terrestrial animals has not been reported during the 30 day period prior to the date of departure of the animals;</p> <p>II.2.8.2. anthrax in ungulates has not been reported during the 15 day period prior to the date of departure of the animals.</p> <p>II.2.9. To the best of my knowledge and as declared by the operator of the consignment, the equine animals described in Part I have not been in contact with kept animals of listed species which did not comply with the requirements referred to in points II.2.3. to II.2.8.1 during the 30 day period prior to the date of departure of the animals, and with the requirement referred to in point II.2.8.2. during the 15 day period prior to the date of departure of the animals.</p>		
	<p>II.3. Attestation of residence and pre-export isolation</p> <p>II.3.1. The equine animals described in Part I have been resident in the country, territory or zone thereof of dispatch during the 90 day period prior to the date of departure.</p> <p>(3) either ○ The equine animals described in Part I are dispatched from a country, territory or zone thereof assigned to Sanitary Group A, B, C, D or G, and during the 30 day period prior to the date of departure from the establishment of origin have been kept in pre-export isolation.]</p> <p>(3)(6) or ○ The equine animals described in Part I are dispatched from a country, territory or zone thereof assigned to Sanitary Group E, and during the 40 day period prior to the date of departure from the establishment of origin, have been kept</p> <p>(3) either ○ [in isolation in an establishment of origin protected from insect vectors.]]</p> <p>(3) or ○ [in an establishment of origin under veterinary supervision, and the country, territory or zone thereof of dispatch is recognised by the World Organisation for Animal Health (OIE) as officially free of African horse sickness.]]</p> <p>(3) <input type="checkbox"/> [II.3.3. Immediately prior to their dispatch from the country, territory or zone thereof of dispatch, the equine animals of the consignment described in Part I have been kept in the establishment approved for assembly operations referred to in point II.1.2. for a period of not more than 6 days after leaving their respective establishments of origin. In the approved establishment, which complies with the requirements for establishments in point II.2., the animals have been kept under conditions that effectively protect their health status and without coming into contact with equine animals not complying with the requirements in points II.2., II.3.1., II.3.2. and II.4. of this certificate.]</p>		
	<p>II.4. Attestation of vaccination and health tests</p> <p>II.4.1. The equine animals described in Part I were not vaccinated against African horse sickness in the country, territory or zone thereof of dispatch and there is no information suggesting previous vaccination.</p> <p>II.4.2. The equine animals described in Part I have not been vaccinated against Venezuelan equine encephalomyelitis during the 60 day period prior to the date of departure, and come from an establishment situated in a country or territory or zone thereof in which Venezuelan equine encephalomyelitis has not been reported during the 24 month period prior to the date of departure.</p> <p>(3) either ○ The equine animals described in Part I are dispatched from Iceland, which is certified as officially free from equine infectious anaemia, where they have been continuously resident since birth, and did not come into contact with equine animals which have entered Iceland from other countries.]</p>		

II. Health information			
Part II : Certification	(3)	or ○ [II.4.3.	The equine animals described in Part I were subjected with negative result in each case to an agar gel immunodiffusion test (AGID or Coggins test) or to an ELISA for equine infectious anaemia(5) carried out on a blood sample taken on _____ (insert date), within the 30 day period prior to the date of departure.]
	(3)	<input type="checkbox"/> [II.4.4.	The equine animals described in Part I are dispatched from a country, territory or zone thereof assigned to Sanitary Group B, D or E, or from a country or territory in which infection with Burkholderia mallei (glanders) has been reported during the 36 month period prior to the date of departure, and were subjected to a complement fixation test for infection with Burkholderia mallei (glanders)(5) carried out with negative result in each case at a serum dilution of 1 in 5 on a blood sample taken on _____ (insert date), within the 30 day period prior to the date of departure.]
	(3)	<input type="checkbox"/> [II.4.5.	The equine animals described in Part I are uncastrated male or female equine animals older than 270 days dispatched from a country, territory or zone thereof assigned to Sanitary Group B, D or E, or from a country in which dourine has been reported during the 24 month period prior to the date of departure, and were subjected to a complement fixation test for dourine(5) carried out with negative result in each case at a serum dilution of 1 in 5 on a blood sample taken on _____ (insert date), within the 30 day period prior to the date of departure.]
	(3)	<input type="checkbox"/> [II.4.6.	The equine animals described in Part I are dispatched from a country, territory or zone thereof which is assigned to Sanitary Group E, from Brazil, Bolivia, Uruguay, or from a country or territory in which surra was reported during the 24 month period prior to the date of departure, and were subjected to a card agglutination test for trypanosomosis (CATT)(5), carried out with negative result in each case at a serum dilution of 1 in 4 on a blood sample taken on _____ (insert date), within the 30 day period prior to the date of departure.]
	(3)(6)	<input type="checkbox"/> [II.4.7.	The equine animals described in Part I are dispatched from a country, territory or zone thereof which is assigned to Sanitary Group E, and
	(3)		either ○ [were subjected to an indirect ELISA or a blocking ELISA for African horse sickness(7) carried out with negative results in each case by the same laboratory on the same day on blood samples taken on two occasions with an interval of between 21 and 30 days, on _____ (insert date) and on _____ (insert date), the second of which was taken within the 10 day period prior to the date of departure.]]
	(3)		or ○ [were subjected to an indirect ELISA or a blocking ELISA for African horse sickness(7) with negative result on a blood sample taken on _____ (insert date), within the 21 day period prior to the date of departure, and the country or territory of dispatch is recognised by the World Organisation for Animal Health (OIE) as officially free of African horse sickness.]]
II.5.	Attestation of the transport conditions		
	II.5.1.	Arrangements have been made to transport this consignment of animals directly to the Union, without subjecting the animals after certification to any further assembly operation outside the European Union and without coming into contact with other equine animals not complying with at least the same health requirements as described in this health certificate.	
	II.5.2.	Arrangements have been made and verified to prevent any contact with other equine animals not complying with at least the same health requirements as described in this health certificate during the period from certification until dispatch to the Union.	
	II.5.3.	The transport vehicles or containers in which the animals are going to be loaded were cleaned and disinfected before loading with a disinfectant officially recognised in the third country of dispatch and they are so constructed that faeces, urine, litter or fodder cannot escape during transportation.	

Part II : Certification	II. Health information		
	<p>Notes:</p> <p>In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland / Northern Ireland in conjunction with Annex 2 to that Protocol, references to European Union in this certificate include the United Kingdom in respect of Northern Ireland.</p> <p>This animal health certificate shall be completed according to the notes for the completion of certificates provided for in Chapter 4 of Annex I to Commission Implementing Regulation (EU) 2020/2235.</p> <p>Part I:</p> <p>Box reference I.8: Provide the code of the country, territory or zone thereof of dispatch as appearing in column 2 of Annex IV to Commission Implementing Regulation (EU) 2021/404.</p> <p>Box reference I.27: "Identification system": The animals must be individually identified with one of the means of identification defined in point (a), (c), (e) or (g) of Annex III to Delegated Regulation (EU) 2019/2035 which permits to link the animals to the animal health/official certificate. Specify the identification system and the anatomic place used on the animal.</p> <p>Part II:</p> <p>(1) There can be one or more equine animals in the consignment.</p> <p>(2) The certificate must be issued within the 48 hour period prior to loading of the animals for dispatch to the Member State of destination in the Union.</p> <p style="padding-left: 40px;">The entry into the Union shall not be allowed when the animals were loaded either prior to the date of authorisation for entry into the Union from the respective country, territory or zone thereof referred to in point II.1.1., or during a period where restrictive measures have been adopted by the Union against the entry of equine animals from this country, territory or zone thereof. Check against columns 8 and 9 of Part 1 of Annex IV to Implementing Regulation (EU) 2021/404.</p> <p>(3) Delete as appropriate.</p> <p>(4) Code of the country, territory or zone thereof and the Sanitary Group as appearing in columns 2 and 3 respectively in Part 1 of Annex IV to Implementing Regulation (EU) 2021/404.</p> <p>(5) Tests for glanders, surra, dourine, equine infectious anaemia and Venezuelan equine encephalomyelitis described by the European Union Reference Laboratory for Equine Diseases other than African horse sickness: https://sitesv2.anses.fr/en/minisite/equine-diseases/sop</p> <p>(6) Statements that relate entirely and exclusively to a Sanitary Group different from the Sanitary Group to which the country, territory or zone thereof of dispatch is assigned, may be left out, provided that the numbering of the subsequent statements is maintained.</p> <p>(7) Tests for African horse sickness described by the European Union Reference Laboratory for African horse sickness: https://www.mapa.gob.es/en/ganaderia/temas/laboratorios/lcv/directrices-diagnostico.aspx</p>
