Subject:

VAT ON SUPPLEMENTS

Dear Sir/Madam,

I am writing to you concerning the controversy surrounding the current Vat treatment on food supplements. Food supplements for me are a means of maintaining my health and well being. I believe in maintaining a healthy lifestyle as oppose to medical treatment.

It is of benefit to me as a person and results in a reduction of health care cost for our HSE.

I welcome the recent VAT treatment concerning sugar tax as it has had a positive impact on the choices my children make when choosing a treat.

Therefore it opposes government policy a decision to impose VAT on healthy food supplements.

I would appreciate if you will consider my personal submission as a means to securing the long standing position of 0% rated food supplements.

Kind Regards,
