Hi,

I would like to highlight how putting 23% VAT on supplements will affect me personally.

I take Udo's oil capsules & New Nordic Apple Cider vinegar tablets daily to aid digestive issues & for joint inflammation.

Since starting I have seen a marked improvement in both symptoms & do not need to take anti inflammatory medication anymore.

The advice to start these products was given to me by a very helpful kind staff member of local health store.

I fear that increasing the price on these products will not only affect my pocket but could cause this shop to close, loosing staff their jobs and the town a place to call to for practical advice to help yourself with natural options.

It seems counter intuitive to tax someone for choosing to take care of their own health.

I do hope this will not come to pass,

Best regards,
