Subject: VAT on Food Supplements

To Whom it concerns,

I am contacting you in relation to the proposal to add VAT to Vitamins. This will not only seriously affect my small, independent business but also my large network of customers who rely on taking these supplements on a regular basis.

My business is a vital part of the community where I support local teams, charities and also my customers, some of whom are elderly who just come in for a chat. If this VAT comes in my business and in turn the local community will be deeply affected.

I am asking that you take all of this into consideration before you make the decision to add VAT to Vitamins.

Best wishes,
