Finance Foodsuppl

Dear Minister for Finance

I am a small health food shop [redacted] I am very concerned about the prospect of the government imposing a tax on food supplements as are my customers.

A lot of them rely on glucosamine for joint mobility, vitamin D, fish oils if they don't like eating fish, probiotics after a course of antibiotics, lutein for eye health,, I could go on and on...They want to take charge of their own health...

A lot of my customers are the elderly or young mothers and they are very worried about not being able to afford to buy these food supplements in the future, they already operate on a tight budget..

I really hope common sense will prevail on this matter and all the people who voiced their concerns through petitions and e mails will be listened to..

Kind Regards
