Finance Foodsuppl

Health Store

To whom it may concern

I run a healthstore and I am very worried about the effect possible taxation would have on my business. I stock supplements, health foods & household goods. I already pay 23% vat on household items, skincare ranges, makeup and confectionary. Should VAT be applied to food supplements also it would massively affect my sales. people do not have the extra to spend.

As a business owner I feel I already pay ample tax contributions & am very, very worried as to whether my business could survive taxation on supplements.

As an industry we have given enough

Kind Regards
