Re: Tax on Alternatives - PBP

Those who avail of the medical system and big pharma are subsidised to a mega amount for products that can cause more damage than they resolve. This Vat Action needs to be a campaign by People Before Prophet on behalf of those who use alternatives at their own expense and do not receive Health benefits to cover their costs. Most adults are on more than one big pharma medication, just check out the cost of their requirements to the tax payer. Now we need to get a proportionate subsidy for those using alternative products.

At the moment the country is white with Hawthorn blossoms, Hawthorn berries are very beneficial for heart conditions and could save the Government millions if used as an alternative to big pharma products.

Yours truly,
