Opposition to VAT on supplements

Hello,

As a sufferer of a long-term chronic illness , central pain syndrome, with severe scalding nerve pain all over and accompanying chronic fatigue, which by the way occurred after a routine operation went wrong. I am reliant on natural supplements which I pay for every month and are life changing for me and I am totally dependant on them, paying for these myself at no cost to the tax payer. These are curcumin, b vitamins, magnesium, coq10 to name just a few.

I know of many other sufferers who could not survive without them including my daughter [redacted]

[redacted] is not cared for by the health system with this.

Please don't penalise us even further by having us pay yet more. We are not burdening the health system which surely is a huge plus when it is under so much pressure

I implore you to reconsider TAXing natural supplements that as a vulnerable section of people need badly.
