Finance Foodsuppl

Vat on supplements

We run a health food store [redacted] this shop has been the centre of the local community for the past [redacted]  
[redacted] The people of the local areas of [redacted] have been getting advise, help and support on how they can take care of themselves using many different forms of supplementing their eating habit with well tested and safe products.

It's very simple, add vat to these products and the additional cost will change wether these people CAN continue to afford the necessary supplements o help them look after themselves.

There is no doubt that the shop we run will find it very difficult to remain open and may close, it's too difficult as it is, and [redacted] staff employed will loose their jobs It's not a smart move to do this.

Revenue are playing games with peoples lives, it's a a shame

Cheers and take care
