

Irish Family-Farm Rights Group (IFRG)

CAP Strategic Plan 2023-27

Additional Submission on Public Consultation on Proposed Interventions (PCPI)

08/12/2021

The Irish Family Farm Group propose a scheme for farmers rearing progeny from suckler herd.

1. To rear the progeny from suckler beef cows for a specified period in a disadvantaged area.
 - This scheme would improve the margin of profit for exiting suckler farming from producing calves to rearing weanling/stores.
 - Improve the margin of profit for existing suckler farmers creating a better demand for their weanlings.
 - Improve the carbon footprint of suckler farming.
