

Circular no. 10

29th June 2022

Dear Advisor

As you will be aware all REAP Complementary Actions must have been completed on site by 31st March 2022. Completed actions must be mapped/identified on GLAM by the advisor. The item or items that are the subject of the investment shall remain in place and be maintained in accordance with the specification requirements for the duration of the contract. A payment claim for Complementary Actions must be submitted no later than 31st July 2022 via GLAM. Please note that only one Complementary Actions claim will be accepted for each REAP contract over the project term. The claim should include all tree planting, hedge planting and hedge gapping actions undertaken.

In addition, it is now that time of the year and we are aware, you will be scheduling on-site field assessments and completing the REAP Year 2 scorecards with each of your REAP clients. Field scorings must be submitted via the GLAM year 2 scorecard function which is now available. For this purpose and your information, you will have received a hardcopy of both the Low Input Grassland (LIG) scorecard and the Multi Species Ley (MSL) scorecard.

Please refer to the DAFM website for reference to the T&Cs, REAP Species Identification Key, which is required for reference only and 2022 Low Input Grassland and Multi Species Ley scorecards.
