

REAP Circular No. 11

25th July 2021

**Results Based Environment Agri Pilot Project (REAP)
Submission of Assessment & Scoring Details on GLAM – YEAR 2 Extension**

Dear Advisor

The REAP terms and conditions specify that field assessments and scoring must be complete and submitted via GLAM by July 31st 2022. The REAP section has contacted a number of advisors in recent weeks regarding further actions required resulting from land re-digitisation. This issue has now been resolved and no further amendments are required to year one plans in advance of submitting the year two data.

The deadline for submission of both the 2022 field scores, and for claiming complementary actions (tree planting, hedge planting and gapping), has been extended to August 31st 2022. Please note that this extension relates to the submission of details via GLAM only and that in-field assessments and scoring should still be finalised using the scorecards provided by the original deadline. Advisors who are in a position to submit year two scores should do so as soon as possible.

REAP participants must engage in compulsory in-field results-based training with their advisor on a one-to-one basis. When submitting your 2022 field data please also ensure that you confirm on GLAM that this training has been undertaken.
