

INTEGRATED HEALTH INFORMATION FOR INTEGRATED CARE

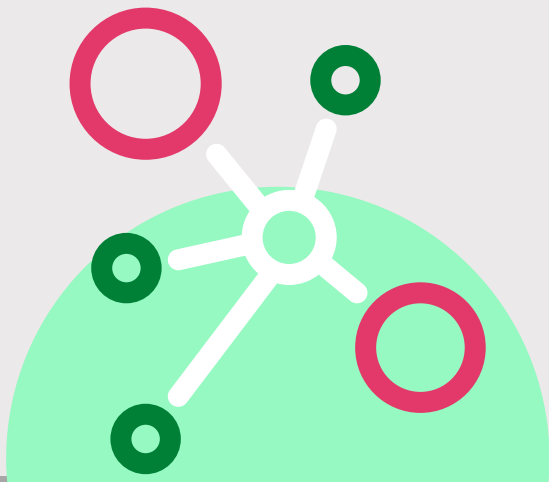

HEALTH INFORMATION BILL

The Act will provide a clear legal basis for transformation of the health information system and allow data processing for the benefit of patients, clinicians and policy makers.

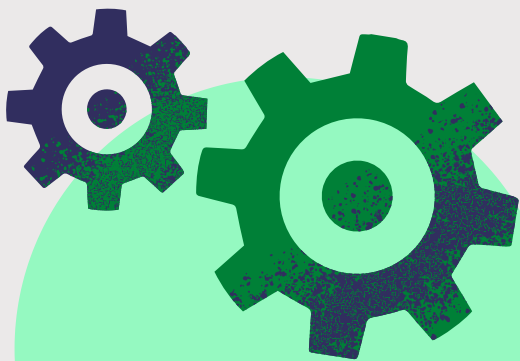

NATIONAL HEALTH INFORMATION AUTHORITY

A strategic national entity to set data and interoperability standards, oversee the use of data for the delivery of integrated healthcare, provide the data science expertise to support health oversight, planning and research.

UNIQUE HEALTH IDENTIFIER

PPSN will be provided for in legislation as a unique health identifier and will be used to link health data relating to each person each time they access healthcare in any setting, public or private.

HEALTHCARE RESEARCH AND INNOVATION

A key focus of health information reform is facilitating access to anonymised data for the purpose of health sector research and innovation.

SUMMARY CARE RECORD

A Summary Care Record will be provided for every resident of Ireland. As a patient moves between healthcare settings, their key data will move with them

HEALTHCARE ANALYTICS AND PLANNING

Linked health data will enable new insights into healthcare needs in each region, better profiling of health risks and population-based resource allocation.

IMPROVING POPULATION HEALTH

Better management of health data will enable the delivery of better care, local resource allocation in keeping with the principles of Sláintecare and enhance understanding of public health risks.

PATIENT CONTROLS THEIR DATA

Patients will have better access to their health data and more control over how that data is used. A National Health Information Guardian will be appointed as a powerful advocate for patient rights.

EUROPEAN HEALTH DATA SPACE

Developments at national level will position Ireland to play a leading role in the development of the EHDS, which will make summary care records interoperable across the EU and create a single market for health data.
