

with an interest in the future development of the Port. Public Information Days have been held in local community venues, where members of the public met with representatives from Dublin Port Company in person to learn more about the review and make their views known.

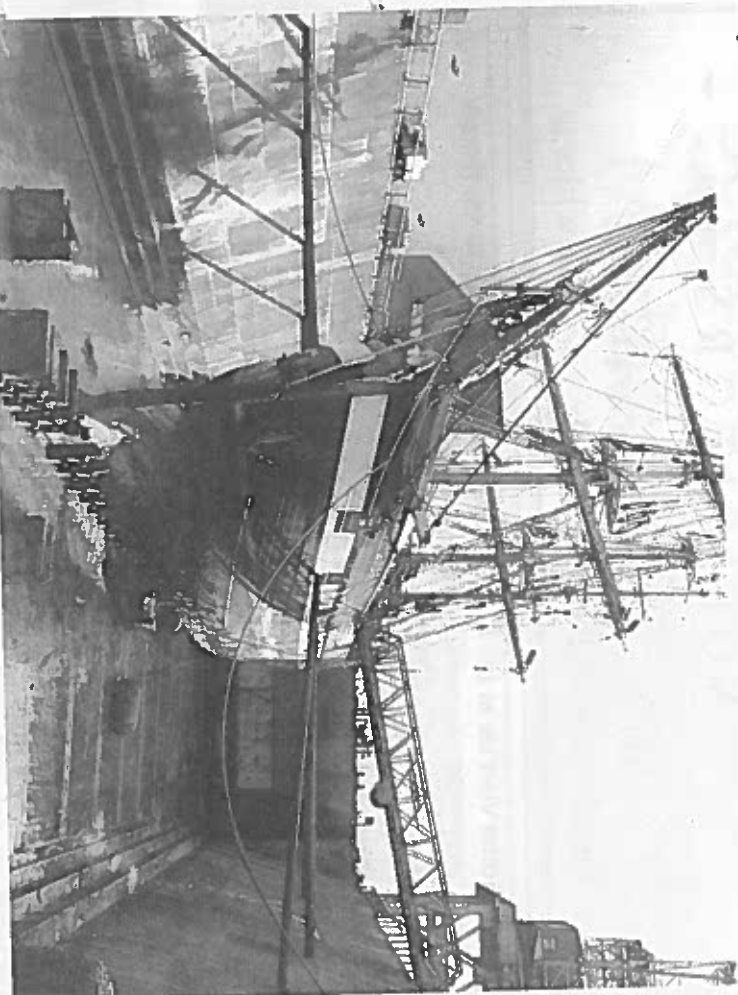

The Masterplan Review 2017 will be published in the summer to ensure that the Masterplan will continue to form the basis of future developments at Dublin Port, as trade volumes grow.

Eamon O'Reilly, Chief Executive of Dublin Port Company, said: "Dublin Port's volumes are now 13% or 4.0m gross tonnes higher than they were at the peak of the boom in 2007. When we originally launched our Masterplan five years ago, we assumed an average annual growth rate of 2.5% over the 30 years to 2040. We now believe we need to

development of offshore renewable energy technologies and infrastructure by opening up access to 57 test facilities across 13 European countries. The project is co-ordinated by MAREL, the Centre for Marine and Renewable Energy, at University College Cork.

MARINET2, the Marine Renewables Infrastructure Network, is a network of 39 partners, involving research centres and organisations who work together to progress offshore renewable energy technologies such as wave, tidal and offshore-wind. This pan-European network will provide marine energy development companies, entrepreneurs, startups and researchers with fully-funded access to marine energy experts and the world's leading wave, tidal and offshore-wind test facilities.

Speaking at the launch of MARINET2 in Dublin, Dr. Jimmy Murphy, Co-ordinator of

The end of an era at Dublin Port as the last remaining working dry dock closes. The dry dock has served the port for over 60 years and has now been decommissioned and is being filled in. The last ship to avail of the largest dry-dock in the State at 200m long was the Jeanie Johnston.
