# Ground Status and Application Procedure

This booklet contains listed details of all current prospecting and mining facilities. Details include the names of the licensees, the geographical location and, with reference to prospecting licences, the details of the minerals for which they have been issued. The locations of these prospecting licences and mining facilities, as well as ground that is available for application is available in an online facility maintained by this Department and accessible at <http://www.mineralsireland.ie/OnlineServices>.

## Available Ground

Ground that is available for exploration under a Prospecting Licence (PL) is available online through <http://spatial.dcenr.gov.ie/ExplorationAndMining/SpatialViewer/index.html>.

### 1. Ground Categories

- a. **Open areas (Green/Pale Green):** Established licence areas available for application at any time are identified by their number. Those areas coloured pale green attract exploration incentives (see Incentive Areas below).
- b. **Held areas (Red):** Current prospecting licences and recently offered licences are restricted to certain minerals (p.12-32). Such ground is available for application for prospecting for other minerals.
- c. **Competition areas (Yellow):** Available Prospecting Licence areas for this competition are listed on page 10

## 2. Prospecting Licence Terms

A prospecting licence typically covers an area of 35 km<sup>2</sup>. Prospecting licences are issued for a period of six years (maximum), for specified minerals, and can be renewed. A minimum expenditure per licence is required, and varies with the age of the licence (see table below). A minimum work programme is also required, details of which are agreed with the licensee. Progressively increased work and expenditure commitments are required on renewal. Work reports are required every two years, and are held confidential for six years thereafter, or until expiry or surrender of the licence. Third party insurance, indemnifying the Minister, is required for the period of the licence.

## 3. Incentive Areas

Significant financial incentives are available for the first six years of exploration on relatively neglected areas or areas where current exploration is restricted to certain minerals. The incentives consist of substantially reduced fees and expenditure requirements, and are designed to provide scope for relatively inexpensive "grass roots" exploration, in order to encourage work in areas where results of earlier exploration had failed to produce sufficient encouragement to the licensee.

The incentives apply to two categories of ground:

- a. **Open Areas** where these Prospecting Licence areas have been available for application for more than four years.
- b. **Areas currently licensed for certain minerals**, but available for exploration for other minerals. Currently licensed areas for which exploration may be undertaken for other minerals are listed on pages 12-32.

**Open Areas available for more than four years:** Where a previously issued Prospecting Licence area has been available for application for at least four years, the licence will be granted, normally, for a term of six years. A reduced fee of €1,250 per Prospecting Licence will apply, payable in advance for each two-year phase as €375 for each of the first and second phases, and €500 for the third phase. This represents a reduction of €1,875 (60%) in fees compared to the standard requirements. (There is no reduction in the application fee).

**Currently Licensed Areas:** Ground is also available to companies that wish to undertake exploration over areas currently held, for minerals that are not assigned to the current prospecting licence holder. Such additional prospecting licences will only be issued where the Minister for Environment, Climate and Communications is satisfied that there will be no clash of mineral interests. The current prospecting licence holder continues to hold a standing Statement of Interest for all other minerals in that area. The fees and expenditure requirements will be the same as for prospecting licences that have been available for over four years i.e. the 'Open Areas' Incentive category (see above).

<b>Fees</b>	<b>Competition / Standard Areas</b>	<b>Incentive Areas</b>
First 2 years	€750	€375
Second 2 years	€375	€375
Third 2 years	€1,500	€500
<b>TOTAL</b>	<b>€3,125</b>	<b>€1,250</b>
<b>Minimum Expenditure Requirements</b>		
First 2 years	€10,000	€2,500
Second 2 years	€15,000	€5,000
Third 2 years	€20,000	€10,000
<b>TOTAL</b>	<b>€45,000</b>	<b>€17,500</b>

## Ground Unavailable

Ground unavailable for application is differentiated as follows:

- Licences under application, and that have been offered to the applicant
- Licence areas that are currently not being made available for application
- Licences that have been applied for under earlier competition
- Excluded areas e.g. National Parks: These are areas that are not available for application at any time.
- Current Prospecting Licences for certain minerals Mining Leases, Mining Licences and Mining Permissions

## Application Procedures

While applications are invited for all categories of available ground, it should be understood that an area may have been already applied for, and that applications are treated on a time-priority basis i.e. "first come, first served". Before making an application for any open area, prospective applicants may wish to consult with the Exploration and Mining Division to ascertain whether there has been a prior application for the area. If there has been a prior application, and if a licence has been offered, the ground is not available for further applications. The acceptance of an application for a Prospecting Licence does not create any obligation on the part of the Minister to grant a licence.

Where there is a valid Statement of Interest over ground that is being applied for, the applicant will be so notified (but no other details provided), and invited to revise their application if they wish to do so.

Applicants are reminded that, if more than one area is applied for, a priority listing of the applications is required; otherwise all applications will be regarded as having equal priority. If separate applications are made over a period of time, the priorities should also take account of any earlier applications. It should be noted that where expenditure proposals are above the minimum required (e.g. in a Competition), these will be taken as the minimum expenditure requirement when the ground is offered to the successful applicant.

All applications for prospecting licences must be made using Form 1 (Application Form), accompanied by a fee of **€190.00 per Prospecting Licence Area**. The form is available to download at <http://www.mineralsireland.ie/OnlineServices/Forms>

Applications may be made to [EMD.info@DECC.gov.ie](mailto:EMD.info@DECC.gov.ie) or by post to:

## Payments to the Department of Environment, Climate and Communications

The Department can accept payment by Electronic Fund Transfer (EFT) only. Each payment **must** quote your 5-digit customer number. For assistance or for first time applicants please contact EMD directly.

Each payment must be followed by remittance notice detailing

- a. Name and address
- b. Your five digit customer number (eg. 12345)
- c. The date and amount paid into the Department's EFT Account
- d. A listing of the specific Department invoice number(s) to which the payment refers.
- e. Where no invoice has issued a detailed description of purpose of the payment.

The remittance notice can be sent to [AccountsReceivable@DECC.gov.ie](mailto:AccountsReceivable@DECC.gov.ie) or by mail to Accounts Receivable, Department of Environment, Climate and Communications, Elm House, Earlsvale Road, Cavan, H12 A8H7.

**All payments are to be made in Euro.** Applicants should be aware that bank charges can apply, particularly when applying from overseas. Provision should be made for these charges by the applicant to ensure the full amount is received in the Department's account. Failure to do so will lead to delays in applications being accepted.

The Department cannot accept any responsibility for payments that cannot be identified due to lack of information. Should you have any queries please contact [AccountsReceivable@decc.gov.ie](mailto:AccountsReceivable@decc.gov.ie)

# Prospecting Licence Competition

## Procedures

Every three months, a Competition is held for certain Prospecting Licence areas. The competition relates to areas for which licences have been surrendered or terminated, or that have been offered but declined, in the previous three months. Previously unavailable ground may also be released through competition. Interested parties normally have two months in which to apply for a licence over a competition area, with all applications received during that period deemed to have been received at the same time i.e. no time priority is given to applications received during those months.

It should be noted that no reduction in financial commitment by aggregating expenditure from contiguous areas will be accepted for the first two-year phase for any licence area awarded under competition.

Prospecting licences available for application under Competition will be published usually on the 1<sup>st</sup> February, 1<sup>st</sup> May, 1<sup>st</sup> August and 1<sup>st</sup> November of each year. They consist of a list of prospecting licence areas that have become available for application under equal competition, together with details of how to apply, and a listing of prospecting licences issued or offered and advertised since the previous publication.

Maps and information on currently held Prospecting Licence areas are available through <https://www.gov.ie/en/service/2f592-map-viewer/>. Updates to competitions are available on our competition page at <http://www.mineralsireland.ie/ExplorationLicensingProcess/ProspectingLicenceCompetitions.htm>.

## Evaluation of Applications

1. In order that interested parties have an equal chance of applying for newly available ground, four times yearly (on 1 February, 1 May, 1 August and 1 November) a Competition list is published of licence areas that have been;
  - i. recently surrendered,
  - ii. offered to competitors but not accepted or
  - iii. made open for application following a period of non-availability.
2. Applications made in the following two months will then be considered on their respective merits, without any regard to time priority. A technical evaluation team will evaluate the candidate companies' applications against the following (weighted) criteria.

<b>Criteria</b>		<b>Mark s</b>
Quality of exploration programme:		45
<ul style="list-style-type: none"> <li>• Proposed exploration expenditure</li> </ul>	20	
<ul style="list-style-type: none"> <li>• Coherence/Applicability/Comprehensiveness</li> </ul>	15	
<ul style="list-style-type: none"> <li>• Dynamic nature of the programme (i.e. tempo of work programme)</li> </ul>	10	
Availability of funds		15
<ul style="list-style-type: none"> <li>• Funds at hand</li> </ul>	10	
<ul style="list-style-type: none"> <li>• Funds that can be made available</li> </ul>	5	
Applicant track record, experience of applicants and the quality of their previous work.		20
Proximity of ground to PLAs held by the applicant (where relevant)		5

<b>Total</b>		<b>100</b>

3. The licence(s) will be offered to the successful applicant. Should the successful applicant choose to decline the licence offer, the licence(s) will then be offered to the next best qualified application.
4. The licensee will be required to fully meet the expenditure commitments and work programme stipulated in their successful application.

## Prospecting Licences Held

All prospecting licences are restricted to certain minerals and hence the PL areas in question are available for application for other minerals (although the current holder is deemed to have a standing Statement of Interest for all these other minerals). The licensed minerals are abbreviated as follows: Base metals (Bm); Barytes (b); Gold (g); Silver (s); Platinum Group Elements (PGE), Rare Earth Elements (REE) Lithium (Li), Beryllium (Be), Caesium (Cs), Niobium (Nb), Rubidium (Rb), Iron (Fe).

There are 454 Licences held on 1<sup>st</sup> November 2020.

## Ireland: Exploration and Mining News November 2020

### Mining Highlights

#### ***Mine Operations***

There are currently two operating mines in Ireland (Figure 1): Navan (zinc-lead) and Drummond /Knocknacran (gypsum). Underground Zn-Pb production from the Lisheen Mine ceased in October 2015. The Galmoy Zn-Pb Mine terminated its mining operations in October 2012.

#### ***2020 Half Yearly (Jan-June) Mine Production***

- Zinc metal in concentrates: 42kt (Equivalent figure for H1, 2019 was 58kt)
- Lead metal in concentrates: 4.3kt (Equivalent figure for H1, 2019 was 7kt)

#### ***2020 Half Yearly (Jan-June) Mine Output (Metal Content)***

##### *(a) Zinc*

- *Ireland produced 7.7% of European zinc mine output in H1, 2020 (5<sup>th</sup> in Europe)*
- *Ireland produced 0.7% of World zinc mine output in H1, 2020 (19<sup>th</sup> in World)*

##### *(b) Lead*

- *Ireland produced 1.7% of European lead mine output in H1, 2020 (10<sup>th</sup> in Europe)*
- *Ireland produced 0.20% of World lead mine output in H1, 2020*

Source of Production Data: International Lead & Zinc Study

## Mining

In the first half of 2020, the Navan underground zinc-lead mine accounted for 7.7% percent of European zinc mine output (11.6% of EU28 production) and 1.7% of European lead mine output (4% of EU28 production). Output from the mine also amounted to 0.7% of world mine production for zinc and 0.2% for lead. According to data published by the International Lead and Zinc Study Group, in the first half of 2020, Ireland ranked 19<sup>th</sup> in the world in relation to zinc mine output. Ireland currently places

fifth in Europe, behind the Russian Federation, Sweden, Portugal and Spain in terms of European mine production for zinc.

**Boliden Tara Mines DAC** operation at **Navan**, Co. Meath, is the largest zinc mine in Europe. In the first half of 2020, the mine milled 1.09Mt of ore grading 5.67% Zn and 0.99% Pb. Since mining operations commenced in 1977, up until 30 June 2020, total production at Navan has amounted to 98.33Mt grading 7.81% Zn and 1.77% Pb. At the end of 2019, the mine's PERC classified ore reserves (proven and probable) stood at 17.4Mt grading 6.0% Zn and 1.6% Pb, whilst mineral resources (measured, indicated and inferred) were 30.4Mt at 7.2% Zn and 1.6% Pb. The latter figure also includes an inferred resource for the 'Tara Deep' deposit of 22.4Mt grading 7.8% Zn and 1.6% Pb. The Tara Deep deposit is located approximately 1km southeast of the main mine, at a depth of 1-2km below surface. This deposit has continued to be the focus of significant exploration drilling throughout 2020.

**Irish Gypsum Ltd.**, a subsidiary of French multi-national Saint Gobain, cumulatively produced approximately 200kt of gypsum in 2019 from its underground (**Drummond**) and open pit (**Knocknacran**) operations in Co. Monaghan. The gypsum is crushed and blended on site, before being transported by road to a production facility at the nearby town of Kingscourt for manufacturing plaster and plasterboard. A smaller tonnage of gypsum is additionally used in the manufacture of cement.

<b>Exploration Highlights</b>	
	454
Number of Companies holding Prospecting Licences:	46
Percentage of Ireland Land Area under Licence:	Approx. 22%
Total Exploration Expenditure in 2019:	€17.53 Million
Exploration Expenditure on PLs in 2019:	€15.17 Million
Exploration Expenditure on State Mining Facilities in 2019:	€2.37 Million
2019 Drilling on PLs (non-mine related):	Approx. 53,500 metres.

## Exploration Activity

As of 29th October 2020, forty six corporate entities held a total of 454 Prospecting Licences (PLs). The largest licence holders are Group Eleven Mining and Exploration Ltd, Boliden Tara Mines Ltd, Teck Ireland Ltd, Adventus Zinc Ireland Ltd and Raptor Resources Ltd. A further 60 Prospecting Licence applications are presently being processed. Since 1<sup>st</sup> May 2020, 25 licences have been issued. Of these, 23 have been granted to Raptor Resources Ltd in Cos Laois (15), Kildare (5) and Offaly (3) and two PLAs have been issued to Group Eleven Mining and Exploration Ltd near Mallow in Co. Cork.

Zinc and lead remain the principal commodities of exploration interest in Ireland. Other commodities that are currently being sought in Ireland include: gold, silver, copper, lithium, barite, antimony, PGEs and gem minerals.

**Group Eleven Mining and Exploration Ltd** has recently been active drilling at a number of prospects in Co. Limerick. The company has undertaken drilling within the 'Pallas Green Corridor', a 25km long, NNW trend of mineralization that extends from **Glencore's** Pallas Green deposit, southwards towards the Kiltelly, **Carrickittle**, Ballywire and **Denison (Aherlow)** prospects. Drilling at Carrickittle in mid 2020 intersected 10.3m grading 14.6% zinc, 5% lead and 43 g/t silver from 56m depth. Group Eleven reports that this intersection is the best mineralization ever encountered at the Carrickittle prospect and the best mineralization that the company has drilled in Ireland, since its inception in 2015. Additional follow-up drilling at Carrickittle commenced in late September.

Group Eleven has additionally undertaken step-out drilling at its **Stonepark** zinc project (Co Limerick), to test for extensions of mineralization. Stonepark is a joint venture between Group Eleven (76.56% interest) and **Arkle Resources Plc** (23.44% interest). In 2018, Group Eleven published an inferred resource estimated for the Stonepark deposit that amounted to 5.1 million tonnes grading 8.7% zinc and 2.6% lead.

**Raptor Resources Ltd.**, a 100% owned subsidiary of Australian explorer **Zinc of Ireland NL**, has published a mineral resource estimate update for its **Kildare Zinc-Lead Project**. The JORC classified Inferred Mineral Resource Estimate for the Kildare project has been increased to 11.3Mt grading 7.8% zinc and 1.2% lead, based on a 5.0% 'zinc equivalent.' The increase in Inferred Resources reflects additional drilling undertaken by the company in the Fault Compartment 3 (FC3) area which lies directly between the McGregor and Shamrock deposits. In 2020, the company also commissioned Golder Associates Ireland Ltd to undertake a high level mining study on the potential development of an underground mining operation. The study has indicated that well established, low-cost mining methods are well suited in their application to the Kildare project.

In July 2020, **Conroy Gold and Natural Resources plc** signed non-binding Heads of Terms relating to a proposed joint venture (JV) with Anglo Asian Mining plc. Anglo Asian is an AIM quoted gold, copper and silver producer in Central Asia with a broad

portfolio of production and exploration assets in Azerbaijan. Under the Heads of Terms, subject to a final Joint Venture Agreement being put in place, Anglo Asian can acquire a total 55% working interest in the JV subjecting to it meeting a number of expenditures, including that required to bring the **Clontibret** gold deposit to fully permitted mine status (See [press release dated 22 July 2020](#) for more details).

## Exploration and Mining Expenditures 2019

Based on provisional figures provided by exploration and mining companies, expenditure during the calendar year 2019 totalled €17.53 million (excluding office overheads). This is over €3 million lower than the 2018 figure of €20.94 million. The expenditure of €17.53 million is comprised of €15.17 million in Prospecting Licence Areas (“greenfield” exploration) and €2.37 million in areas covered by State Mining Facilities (SMF, “brownfield” exploration). Expenditure on drilling on PLs in 2019 amounted to €9.34M, which was lower than the equivalent figure for 2018 (€10.73M).

The expenditure in PL Areas is mainly related to base metal exploration (€14.05M), with lesser amounts being spent on gold (€760k) and other minerals (€357k).

## Drilling statistics

Preliminary figures provided by Prospecting Licence holders indicate that a total of 53,499 metres of drilling (non mine-related) was carried out during 2019, mainly for base metals (zinc, lead).

### Re-Structuring of Exploration & Mining Division

The recently re-named Department of the Environment, Climate and Communications is restructuring the delivery of its Geoscience functions from January 2021. The regulatory, licencing and operational roles currently held by Petroleum Affairs (PA) Division and Exploration and Mining (EM) Division will transfer to a new dedicated Geoscience Regulation Office within the Department. Simultaneously, the full policy and legislative functions that currently reside within the PA and EM Divisions will move to a new Geoscience Policy Division, also within the Department. The new arrangement will ensure that there is a clear divide between policy/legislation functions and regulation/monitoring functions.

### Publicly Available Prospecting Licence Area Data

#### Public viewing access

Publicly available Prospecting Licence area data consists of non-confidential company work reports, both on surrendered Prospecting Licences, and on work more than 6 years old in current Prospecting Licences. This 'open file' data is available for viewing by members of the public from the Geological Survey of Ireland ([www.gsi.ie](http://www.gsi.ie)), Department of Environment, Climate and Communications, Beggars Bush, Haddington Road, Dublin, D04 A068, and also from the Exploration and Mining Division, ([www.DCCE.gov.ie/EMD](http://www.DCCE.gov.ie/EMD)) 29/31 Adelaide Road, Dublin, D02 X285 (only for data released from 1st January, 2000). The following viewing arrangements currently apply:

- Access to the Databank held by GSI. By making an appointment with the Minerals Section to view the reports at the GSI (see contact below), or by visiting the GSI Customer Centre and accessing the databanks through the public computer system.
- Digital copies of these may be obtained. Please contact GSI for details and charges. All digital data from EMD is free.
- Photocopies (b/w). These are supplied at cost. Currently the charges are: A0 €6.00; A1 €5.00; A2 €3.00; A3 €0.30; A4 €0.15

For appointments or further information, please contact either the Geological Survey, Eoin McGrath of the Minerals Section, Tel: 01 678 2863, [eoin.mcgrath@gsi.ie](mailto:eoin.mcgrath@gsi.ie), or the Exploration and Mining Division (Dr Wayne Cox, Tel: 01 678 2677, [wayne.cox@decc.gov.ie](mailto:wayne.cox@decc.gov.ie)).

## **Catalogue of Open File Data**

A digital copy of the 'Catalogue of Exploration Company Open File Data' is available free of charge from the Geological Survey. The catalogue lists all of the approximately 75,000 individual items (reports, maps, sections, drill logs), which are currently held in the open file system. The Catalogue is available as an Access database on CD and may be obtained by applying to Eoin McGrath of the Minerals Section, Tel: 01 678 2863 or: [eoin.mcgrath@gsi.ie](mailto:eoin.mcgrath@gsi.ie).

## **Online Data Availability**

Since mid-2003, the Exploration and Mining Division have been progressively providing publicly available company exploration data released since 1<sup>st</sup> January 2000 on the [www.MineralsIreland.ie](http://www.MineralsIreland.ie) website. Data relating to over 1700 PL areas, including those in the current PL competition, are now available.
