I, the undersigned official veterinarian, hereby certify that I have verified the information provided to me by the Center Veterinarian in charge of the semen collection center listed in Box I.11; and that:

The semen described in this certificate:

II.1. Was collected, processed and stored in a semen collection center, hereinafter "SCC," approved and supervised by the veterinary competent authority of EU member state in accordance with Council Directive 90/429/EEC, as last amended.
 Name of SCC
 Address of SCC
 SCC Center Approval No.
 Veterinarian
 Veterinarian

II.2. Was either (1) maintained solely under the control of the Center Veterinarian for the above SCC

II.3. or (1) Initially maintained under the control of the Center Veterinarian for the above SCC, and subsequently under the control of the Center Veterinarian for a different semen collection center, hereinafter "SCC2", currently approved by the veterinary competent authority (2) in accordance with Council Directive 90/429/EEC as last amended.
 Name of SCC2
 Address of SCC2
 SCC2 Center Approval
 No. Veterinarian
 Veterinarian

II.4. Was kept separate (3) from other semen not intended for export to the United States.

II.5. Was shipped in a new or thoroughly cleaned and disinfected container (that, in the case of frozen semen, was charged with fresh, unused liquid nitrogen) that was sealed with an intact, tamperproof seal recognized by the competent veterinary authority of the member country, and as recorded in Box I.21.

Each semen donor (and teasers, if used)

II.1. Was established as a resident of an approved SCC only if admitted by a formal process of quarantine, observation, and testing, in accordance with Council Directive 90/429/EEC, as last amended.

II.2. Was transported to the SCC in a vehicle that was cleaned and disinfected.

II.3. The EU Member State is designated by the USDA to be free of foot-and-mouth disease (FMD), African swine fever, and swine vesicular disease, as indicated in 9 CFR Part 94 and other official publications.

II.4. Was not imported into EU member state of origin listed in Box I.7 from a region that is not recognized by the USDA in 9 CFR Part 94(4) as free of foot-and-mouth disease, and swine vesicular disease, or designated by USDA in 9 CFR Part 94 as affected with African swine fever.

II.5. Did not originate from or was not imported into EU member state listed in Box I.7 from a region where classical swine fever (CSF) is known to occur (except for the APHIS- defined European CSF region), as indicated in 9 CFR Part 94(4) and other official APHIS publications; has not been commingled with domestic swine that at any time were in any of these regions; and has not transited such regions unless moved directly through the region in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination.

II.6. Either (1) Has not been in, or commingled with any domestic swine from, a restricted zone (5) in the APHIS-defined European CSF region established because of an outbreak of CSF in domestic swine or wild boar;

II.7. Or (1) has been in a restricted zone (5) in the APHIS-defined European CSF region established because of an outbreak of CSF in domestic swine, but was not commingled with any domestic swine of such a region, and was not collected for export to the United States, from the time of detection until the designation of restricted zone was removed by the Competent Veterinary Authority of EU member state or until 6 months following depopulation of the domestic swine on affected premises in the restricted zone and the cleaning and disinfection of the last affected premises in the zone, whichever time was later. Dates of outbreak designation and removal of restrictions:

II.8. Or (1) has been in a restricted zone (5) in the APHIS-defined European CSF region established because of the detection of CSF in wild boar; but was not commingled with any domestic swine of such a region and was not collected for export to the United States from the time of detection until the designation of restricted zone is removed by the Competent Veterinary Authority of EU member state. Dates of outbreak and removal of restrictions:

II.9. Has not transited a restricted zone (5) as described in II.6- 8, unless moved directly through the zone in a sealed means of conveyance with the seal determined to be intact upon arrival at the point of destination, or unless the semen was collected after the periods described.

II.10. During the 60 days prior to semen collection for export to the United States, was/were not corralled, pastured, or held with other animals under any restrictions due to animal health concerns.

II.11. All testing performed as required by the protocol to import swine semen from member states of the EU per the protocol: [USDA APHIS | Import Swine and Germplasm](#)
