WHAT IS A SUPPORTING THE SAFE PROVISION OF SCHOOLING (SSPS) REPORT?

The safe and sustainable provision of schooling in the context of the current public health pandemic is an important national priority. Ensuring that Youthreach (YR) centres are safe learning and working environments for all is vital and the detailed guidance issued by the Department of Education (DE) to all schools and settings is designed to support the ongoing provision of schooling. The guidance provides key messages to minimise the risk of COVID–19 for staff, learners, families and the wider community while recognising the importance of the safe and sustainable provision of schooling for the health and wellbeing of students and of society as a whole.

The Inspectorate carries out a programme of SSPS visits to schools and centres for education in order to provide an assurance to the public that the Department's guidelines are being implemented and to support schools in implementing them.

An SSPS report is a report that is published following an SSPS visit.

DURING AN SSPS VISIT THE INSPECTOR:

Engages with: • YR Coordinator • Lead Worker Representative(s) • Selection of staff members	Reviews: • COVID-19 Policy Statement • Centre's risk assessment to see that Covid-19 is added as a risk • Centre's arrangements for signing in and out
Observes: • Physical distancing arrangements • COVID-19 signage • Sanitising units • Isolation area	Conducts: • Level 1 Child Protection Checks

HOW TO READ THIS REPORT

The checks conducted during this inspection are based on the COVID – 19 Response Plan for the safe and sustainable reopening of YR centres. The checks are grouped into four main areas:

1. Planning
2. Appointment of a Lead Worker Representative (LWR)
3. Provision of staff training
4. Implementation of control measures

Each main area has a number of checks; these are the specific actions that a centre should take in relation to each area.

When the inspector determines that the centre has not fully implemented one of the checks, the report provides some additional comment on the check. It also advises on actions that the centre should take in order to fully implement the guidance provided.

The report also indicates whether or not the centre met the requirements in relation to the three child protection checks conducted during the visit.

A *Guide to Supporting the Safe Provision of Schooling (SSPS)* is published on the website of the Department of Education and can be accessed here. This guide details how SSPS visits are carried out and also provides the full framework used by inspectors during the visits.

The board of management of the school was given an opportunity to comment on the findings and recommendations of the report; the board chose to accept the report without response.

CHILD PROTECTION

During the visit, the following checks in relation to the YR centre's child protection procedures were conducted:

1. The name of the DLP and the Child Safeguarding Statement are prominently displayed near the main entrance to the YR centre.
2. The Child Safeguarding Statement has been ratified by the board and includes an annual review and a risk assessment.
3. All teachers visited reported that they have read the Child Safeguarding Statement and that they are aware of their responsibilities as mandated persons.

The YR centre has met the requirements in relation to each of the checks above.
