If the volume of information is such that DAFM consider this mechanism for making the information available I request to receive the information either by post on an SDHC card or similar or by accessing the information in situ at the local DAFM office in Drumshanbo, Co. Leitrim. I would ask that DAFM considers the comments of the Commissioner in cases: OCE-XXX-XXX and OCE-XXX-XXX "It is worth noting that if Coillte accepts that a right of access exists to such operational monitoring information, as it decided to release in the previous similar cases, albeit for a smaller area, there is nothing to stop it from publishing such information regularly, thereby avoiding the need to process AIE Requests seeking these reports. I wish to request information under the provisions of EU Directive 2003/4/EC 'Access to Environmental Information', "The AEI Directive"; and SI 133/2007 European Communities (Access to Information on the Environment) Regulations 2007, as amended, "The Regulations" – relating to Ireland's implementation of the AEI directive. Information to include the name of the party carrying out the original screening and the ecologist who carried out the validation. This request does not require every file to be accessed and checked. FS-DAFM must operate a procedure by which a file is referred for Validation. Once this process is understood then identifying the relevant cases should be fairly straightforward. I would suggest that the start point for locating this information is through the ecology section. Additionally Niall Phelan of Environmental Facilitation Limited carries out many validations so correspondence with Mr Phelan and the Inspectorate / Ecology Section should identify records falling within the scope of my request. If the information is already publicly available can you please identify the relevant licence number/s so that I can locate them on the FLV. Item 2. CTS Database 1. A copy of the latest iteration of the Coillte Tracking System Database To clarify, this is for information held by DAFM to reconcile Coillte licence applications. A copy of the Microsoft Access Database file will meet this request. If the database contains protected or restricted information an extract can be made from	Refuse

			the database excluding any categories of information which contain restricted data. My understanding is that the vast majority of the information is non sensitive, including that on Hen Harrier, Curlew, Fresh Water Pearl Mussel and Kerry Slug. I understand that such data is recorded as either True or False as to whether the species is relevant to the site. It does not disclose environmentally information to a degree of granularity that could impact adversely of the species. For your assistance; Introduction to importing, linking, and exporting data in Access - Microsoft Support I request that the information is provided in an electronic format as soon as is possible.
