AIE.25.075	26/02/2025	Other	Item 1.In relation to the Climate Resilient Reforestation (CRR) Scheme (which is potentially a great scheme) a)How many applications have been received since the scheme opened? To date how many applications have been approved for funding under: Element 1 Element 2 Element 3 b)How many staff are engaged in processing CRR applications? c)What are the specific job titles and roles in relation to those processing the scheme applications? d)Once a CRR application is received by DAFM, what are the steps in the processing of a CRR application and which staff grades deal with the application as it goes through the system? Please use diagrams if it is easier to illustrate the process. 2. a)How many applicants under the Native Woodland Conservation (NWC) scheme in the last forestry programme 2014-2022 were asked to re-apply in the new forestry programme 2023-2027 by opting in to CRR? b)How many staff are engaged in processing NWC applications? c)What are the specific job titles and roles in relation to those processing the scheme applications? d)Once a NWC application is received by DAFM, what are the steps in the processing of a NWC application and which staff grades deal with the application as it goes through the system? Please use diagrams if it is easier to illustrate the process. 3. a)In relation to the Native Tree Area (NTA) Scheme and how DAFM are interpreting Section 12(3) of the National Monuments (Amendment) Act 1994: When the owner or occupier (not being the Commissioners) of a monument or place which has been recorded under subsection (1) of this	Part Grant

			section or any person proposes to carry out, or to cause or permit the carrying out of, any work at or in relation to such monument or place, he shall give notice in writing of his proposal to carry out the work to the Commissioners and shall not, except in the case of urgent necessity and with the consent of the Commissioners, commence the work for a period of two months after having given the notice. Some sites that are eligible for NTA, according to the screening layer on the iforis system, are being refused for the following reason: -Any proposed afforestation project at this location would, due to its proximity to an archaeological site or monument, require referral to NMS, DHLGH, inter alia pursuant to Section 12(3) of the National Monuments (Amendment) Act 1994, and may also require site specific archaeological or built heritage conditions or constraints. The area proposed for the NTAS project is thus deemed INELIGIBLE for the scheme from an archaeology and built heritage perspective. What are all of the criteria in relation to archaeology, for example distance in metres, that apply to deciding whether NTA sites are eligible or ineligible? b)When Climate Resilient Reforestation approvals are issued will they be shown on the weekly Dashboard and if they are not shown on the Dashboard does that mean that approvals have not been issued? c)There is one reference only to the NWC scheme in Table 49 of the Annual Forest Statistics Report 2024. Do these figures represent the grant payments only or do they include annual premiums as well? What are the grant payments for NWC in 2024 and what are the premium payments for NWC in 2024?

AIE.25.108	24/03/2025	Other	Felling Section, ChatGPT agrees with me that using the AA from a Thinning Project for a Clear Fell project is not appropriate on a blanket basis as DAFM are trying to get away with. "An Appropriate Assessment (AA) under the Habitats Directive (92/43/EEC) is required when a project may have a significant effect on a Natura 2000 site (a site designated as a Special Area of Conservation (SAC) or Special Protection Area (SPA)). For a tree thinning project and a clear felling project, the key differences are the scale and potential impact on the habitat. 1. Tree Thinning: This generally involves the selective removal of trees to improve forest health or biodiversity. The effects may be limited, and if it involves minimal disturbance to the environment, it may not trigger a need for an AA or could be covered by a simpler assessment (if it's unlikely to impact the Natura 2000 site significantly). 2. Clear Felling: Clear felling involves removing most or all trees in a given area, which can result in more substantial changes to the habitat. This could potentially lead to greater disturbances (e.g., habitat loss, fragmentation, or changes to species populations) that might have more significant effects on the Natura 2000 site. The AA for a tree thinning project may not be sufficient for a clear felling project because clear felling usually has a more significant impact on the environment, which would likely require a new, separate and more detailed AA. The scale of disturbance in clear felling would likely trigger a new assessment of the potential impacts on the Natura 2000 site, including potential cumulative effects, even if the AA for thinning was previously conducted. Therefore, no, an AA for a tree thinning project generally cannot be directly used for a clear felling project, as the potential impacts differ in scale and nature, and a more detailed assessment is typically required for clear felling." DAFM's blanket approach to permitting an AA for a Thinning project to be sufficient for Clear-felling appears to be contrary to the law. This is without even considering that dealing with windblown timber at scale presents an additional series of environmental hazards which would not have been considered in the original assessment. You might explain, for example, how silt traps can be installed in advance of works on sites that are inaccessible on foot. You cannot let economic expediency	Refuse

			dictate the agenda here - you have a legal responsibility to protect the environment and you are failing in that duty. Please provide a copy of any legal advice sought or received on this issue which informed the Department's position. Also provide me with any engagement with the Commission regarding the approach that you are taking to this issue to confirm that you have acted with due diligence and precaution. Please treat as an AIE request if necessary and forward on to the relevant section of your public authority.

I refer specifically to paragraph 65 i.e. '(65) Ireland is setting a national target of 50% for broadleaf species under the Forestry Programme 2023-2027. Progress towards this target will be monitored on a quarterly basis. Should it appear that this target is not on track to be met, the DAFM will make appropriate interventions.' Please provide, by email, for the period 1 March 2025 to 31 March 2025 (both dates inclusive) a copy of all information monitoring the national target of 50% broadleaf species under the Forestry Programme 2023-2027. AIE.25.123	01/04/2025	Other	Item 1. FI Determination over-ridden on Validation 1.A copy of any Appropriate Assessment Screening (all schemes) which have been screened out from an Appropriate Assessment based on a screening validation by an ecologist after the original screening decision by the Forestry Inspector (or other) screened-in the project where the Determination of either the Inspector or the Ecologist is dated during the month of March 2025. Information to include the name of the party carrying out the original screening and the ecologist who carried out the validation. This request does not require every file to be accessed and checked. FS-DAFM must operate a procedure by which a file is referred for Validation. Once this process is understood then identifying the relevant cases should be fairly straightforward. I would suggest that the start point for locating this information is through the ecology section. Additionally Niall Phelan of Environmental Facilitation Limited carries out many validations so correspondence with Mr Phelan and the Inspectorate / Ecology Section should identify records falling within the scope of my request. If the information is already publicly available can you please identify the relevant licence number/s so that I can locate them on the FLV. Item 2. CTS Database 1.A copy of the latest iteration of the Coillte Tracking System Database To clarify, this is for information held by DAFM to reconcile Coillte licence applications. A copy of the Microsoft Access Database file will meet this request. If the database contains protected or restricted information an extract can be made from the database excluding any categories of information which contain restricted data. My understanding is that the vast majority of the information is non sensitive, including that on Hen Harrier, Curlew, Fresh Water Pearl Mussel and Kerry Slug. I understand that such data is recorded as either True or False as to whether the species is relevant to the site. It does not disclose environmentally information to a degree of granularity that could impact adversely of the species.
