SCHEDULE 1

HARVEST PLAN - MS|S1|9|557|9-NOV.2010|PC

229

Proposed Seaweed harvesting plan for Fenit Island western shore (inter-tidal area)

	Chondrus crispus	*Palmaria palmata*	*Fucus serratus*	*Laminaria digitata*
January	0	0	100	100
February	0	0	100	100
March	200	100	100	100
April	200	100	100	100
May	200	100	100	100
June	200	200	100	100
July	200	200	100	100
August	200	200	100	100
September	200	100	100	100
October	200	100	100	100
November	100	0	100	100
December	0	0	100	100
Total	**1,700**	**1,600**	**1,200**	**1,200**

This plan was devised with the assistance of BIM with a view to maximising the quality of the seaweed being harvested, while reducing the effects on the resource. All figures show above are in Kilograms and represent a maximum that will be removed from the area.
