# Social Housing Construction Projects

## Status Report Q1 2024

Prepared by the Department of Housing, Local Government and Heritage
**gov.ie/housing**

# Quarter 1 of 2024: Social Housing Construction Status Report

## Social Housing Construction Status Report

The Social Housing Construction Status Report (CSR) provides a breakdown of local authority and Approved Housing Body social housing new-build activity. The Report includes scheme-level details on the completion of social housing new builds, as well as information on each construction scheme as it progresses through the design and tender processes.

## Social Housing

New-build social housing delivery is supported through a number of funding streams and is delivered via local authorities and Approved Housing Bodies. The number of new-build social homes completed and in the pipeline has been increasing, with new construction projects being added to the pipeline regularly.

The Construction Status Report shows that 105 new social homes were completed in Q1 2024.

An additional 46 local authority Part V units and 7 TAU units are not reflected in the CSR.

## Construction Status Report

The latest Construction Status Report shows that 9,179 social homes are currently onsite with an additional 15,848 homes at design and tender stage. In Quarter 1 2024, 121 new construction schemes (2,595 homes) were added to the pipeline. In total the Construction Status Report provides details on 43,795 new-build social homes across 2,570 schemes.

**Tracking Progress in advancing the Construction Agenda - the Construction Status Report**

The Social Housing Construction Status Report for Quarter Q1 2024 has now been finalised and the attached Appendices set out progress made to date in advancing the construction pipeline**.**

**Appendix 1** sets out the current status of schemes as of the end of Q1 2024.

**Appendix 2** sets out the various funding programmes for the 43,795 homes delivered or in the pipeline.

**Appendix 3** sets out explanatory notes on terms used in the report.

It should be noted that the Social Housing Construction Status Report does not reflect the totality of the overall Build Programme. In addition to the homes reflected in the Report, local authority Part Vs and new Traveller Accommodation homes are being delivered and these are reflected in the overall statistics published by the Department.

Part V is a very important contributor to new-build social housing delivery. This delivery stream is not generally reflected in the CSR; however, some AHB Part V being delivered as part of larger schemes may be included. In Q1 2024, a total of 48 Part Vs were delivered. Two CALF Part V homes delivered in Q1 2024 are included in the CSR but 46 local authority Part V homes are not reflected in the CSR. There were also 43 local authority leased Part V homes delivered in Q1 2024, which are not included in the CSR or the overall build delivery figure. A full breakdown by LA of Part V output is available on the statistics' page of the Department's website.

**Appendix 1 – Status of Schemes**

| Table 1 | Q1 2023 | | Q2 2023 | | Q3 2023 | | Q4 2023 | | Q1 2024 | |

| **Totals**** | **1,961** | **32,480** | **2,099** | **34,869** | **2,259** | **37,015** | **2,449** | **41,200** | **2,570** | **43,795** |

* Some schemes are being delivered in phases and this is reflected in the number in the table. When we say 2,570 schemes, this includes schemes being delivered in phases.

** Completed units from 2016 to end 2020 have been removed from the CSR.

Note: Previous versions of the CSR are available on https://www.gov.ie/en/collection/cb885-social-housing-construction-projects-status-reports/ and https://data.gov.ie/.

## Appendix 3 - Explanatory notes

The Construction Status report is a full compendium of live LA and AHB social housing new-build activity. The following schemes are represented in the Construction Status Report:

- Social Housing Capital Investment Programme (SCHIP)
- Capital Assistance Scheme (CAS)
- Capital Advance Leasing Facility (CALF)
- Public Private Partnership (PPP)

Previous versions of the CSR included schemes which completed in prior reporting periods to provide a more detailed profile of activity. The Q4 2021 CSR contained data on over 40,000 homes across almost 2,800 schemes/phases of schemes. To streamline the publication of the CSR, social homes completed in 2016 to 2020 are no longer included in the CSR. Previous versions of the CSR are available on the Department's website at gov.ie - Social Housing Construction Projects - Status Reports (www.gov.ie) and data.gov.ie and include the relevant data on completed social homes.

The Report is published in open format on the data.gov.ie website, which allows the user to filter and analyse data.

**The Social Housing Capital Investment Programme (SHCIP)** provides funding to local authorities for the provision of social housing by means of construction and acquisition.

**The Capital Assistance Scheme (CAS)** provides essential funding to AHBs for the provision of accommodation for persons with specific categories of housing need such as Homeless and Older Persons, People with Disabilities, Returning Emigrants and Victims of Domestic Violence.

**Four-Stage Approval Process**

The funding approval process for social housing projects supported by the Department under the SHCIP and CAS schemes outlined above is in line with the Government's Capital Works Management Framework (CWMF), the same approach used for other publicly funded Capital construction projects. While there are nine points of review within the CWMF, the Department has combined these to just four for capital-funded social housing construction projects.

The Departmental approvals represent a small proportion of the time taken in advancing a build project onto site. The approach followed means that local authorities forward design proposals and costings to the Department sequentially, as the local authorities advance the projects through their own planning work. Check lists, guidance and templates have been issued to the local authorities to assist them in this process.

The 4 stages are as follows:

**Stage 1:** Capital Appraisal to verify the business case and basic project suitability – this is a light presentation of information; no design and only indicative costs are required at this initial stage.

**Stage 2:** Pre-planning outline design and cost check – following site investigations, this involves the level of designs that are required for the Part 8 planning process and a completed QS cost plan; detailed tender drawings and resulting costs are not needed at this stage until planning permission is obtained.

**Stage 3:** Pre-tender costs check – the more detailed designs and cost estimates have been prepared by the local authority design team at this stage and a cost check submitted before going to tender but if costs are consistent with the earlier stages, then this review will be swift. Unless there have been changes to the design following Part 8/planning, or conditions to be met, the design is not reviewed.

**Stage 4:** Tender approval from Department – the tenders have been received and assessed by the local authority and again, if costs are consistent with the earlier stages, this review will be swift.

There is now a Target Programme for advancing social housing capital-funded projects through design, planning and approval. This overall programme sets a target of 59 weeks from stage 1 submission by the local authority, to contract award for the construction. It establishes target turnaround times for the Department to carry out the review process and for the local authority to carry out the design of the scheme, the planning process and the procurement of a builder. While the aim of the programme is to create a realistic but ambitious target programme, it is acknowledged that external factors can affect construction projects, for example, delays can arise at planning, where the views of Councillors and communities are taken into account, but these can be minimised by early engagement. Site condition difficulties should not arise if appropriate site investigations are carried out at the beginning of the process.

**The single-stage approval process**

The aim of the Single-Stage Approval Process is to give greater autonomy to local authorities by reducing the number of approvals sought from the Department and shortening the pre-construction programme. It is estimated that this may reduce the pre-construction programme by up to 8 weeks, thus accelerating delivery of much-needed social housing construction projects. At the end of 2023, the following revisions were made to the single-stage process:

- The value limit on the Single-Stage Approval Process for local authority social housing Capital Construction Projects has been increased from €6m to €8m;
- The criteria under which a local authority may seek budget adjustment (post-single-stage approval) has been expanded to include “additional requirements arising from delayed site investigation/survey information” (subject to conditions);
- Local authorities will be expected to use the Single-Stage Approval Process for projects below the €8m threshold with a rationale for not using that option being required.

Under the Single-Stage Process, once approval is obtained, the local authority can take the project forward through planning approval, tender and construction, without further reference to the Department.

**Capital Advance Leasing Facility (CALF)**

The Department offers financial support to Approved Housing Bodies (AHBs) in the form of a long-term loan under the Capital Advance Leasing Facility (CALF) to assist with the financing of the construction or acquisition of homes that will be provided for social housing use. This loan facility can support from 25%-30% of the eligible capital cost of the project, where the homes will be provided under long-term lease arrangements to local authorities for social housing use. Funding is provided to AHBs through local authorities.

CALF approvals do not follow the same approval process as the SHCIP four-Stage process. The assessment process includes a full financial evaluation which is carried out in conjunction with the Housing Agency. The funding approval may be provided at various stages of project development.

**Public Private Partnership (PPP)**

Social Housing Public Private Partnerships (PPPs) is a delivery structure whereby social housing homes remain in State ownership throughout. Social Housing PPPs are being delivered in partnership with the National Development Finance Agency.

Homes delivered through PPP use an 'availability-based PPP model'. A private sector company designs, builds, finances and maintains the social housing homes. In return, it receives payments which are spread over 25 years.

As the model is 'availability-based', the private sector partner is responsible for ensuring that homes are available for occupation. The local authority is responsible for allocating tenants. The private sector partner provides maintenance and upkeep services for 25 years. After this time, the homes are returned to the State in good condition, subject to reasonable wear and tear.

## Design and Build Procurement

The Design & Build Procurement approach is a method of housing delivery whereby the design-build contractor, working under a single contract, provides design and construction services. The move to this delivery approach aims to reduce costs, drive faster delivery times, and increase construction sector productivity and sustainability, while maintaining high quality, based on experience to date.

In July 2023 the Roadmap for Increased Modern Methods of Construction (MMC) Adoption in Public Housing Delivery was published and represents a major public sector innovation and transformative initiative that will enable an increase in the building of social and affordable homes using MMC approaches. The use of the Design and Build form of Public Works contract aligns with the MMC Roadmap as it encourages increased innovation and facilitates the adoption of MMC in the delivery of social housing. A number of local authorities have considerable experience in delivering homes through Design and Build forms of procurement which have delivered housing schemes in Light Gauge Steel Frame, Timber Frame, and Insulated Concrete Formwork. In general terms, under a Design & Build contract the contractor may propose adoption of any MMC system, once performance standards (certification, durability, etc.) are met. All Design & Build / MMC dwellings are required to be of a high quality, fully certified, compliant with Building Regulations, with a 60 year durability for all key elements.

Table 1 – Design & Build below shows the progress of the Design and Build procurement approach over the past 12 months. A total of 1,675 social homes have been progressed using Design and Build, with 774 social homes completed. A further 519 social homes were onsite and 382 are at various stages of the approval process at the end of Q1 2024.

| Table 1 - Design & Build | Q2 2023 | | Q3 2023 | | Q4 2023 | | Q1 2024 | |

**Accelerated Delivery using MMC**

In addition to the Design and Build Projects outlined above, the Department is separately overseeing a number of projects involving accelerated delivery of housing on local authority sites.

In December 2022, funding of €94m was provided to local authorities to address legacy land debts. The provision of this funding was linked to the immediate development of a housing proposal, a commitment to use Modern Methods of Construction (MMC) and for construction to start no later than the end of 2024. A total of 26 sites received funding as part of an accelerated delivery programme with additional sites since added.

Governance structures have been established to provide for the management of delivery on the sites as a single cohesive Accelerated Delivery Programme. A Programme Steering Group, chaired by the Department, oversees the programme and includes representatives from the Department, local authorities, the Housing Agency and the Office for Government Procurement. The governance structures also include a procurement subgroup and a local authority subgroup, with representatives from each of the local authorities with sites in the programme.

A series of regional frameworks are also being established, with a lead authority and project nominated in each region, with six framework regions identified at present. In addition to the 13 local authorities included in the Accelerated Delivery Programme, a further 15 local authorities will have access to a Design & Build contractor framework

once established, which will further increase the uptake of Design and Build procurement.

Table 2 – Accelerated Delivery below shows the progress of the Accelerated Delivery using MMC programme over the past 12 months.

| **Table 2 – Accelerated Delivery** | **Q2 2023** | | **Q3 2023** | | **Q4 2023** | | **Q1 2024** | |
|---|---|---|---|---|---|---|---|---|

| Stage 4 - Tender Report or Final Turnkey/CALF approval | - | - | - | - | 1 | 65 | 1 | 20 |
| Site Start | - | - | - | - | - | - | 1 | 65 |
| Site Finish | - | - | - | - | - | - | - | - |
| **Totals** | **31** | **1,586** | **32** | **1,529** | **33** | **1,573** | **38** | **1,627** |

**Part V data on the CSR**

The Construction Status Report does not contain data on Part V schemes funded under the SHCIP scheme or delivered by LAs without DHLGH funding. It does contain a small number of AHB Part Vs which are advancing as part of larger schemes approved under the Capital Advance Leasing Facility. The full Part V output is published on the statistics' page of the Department's website.

**Disclaimer:**

While every effort is made to ensure that the data in the report is accurate at the time of publication, the report covers 43,795 new-build social homes across 2,570 schemes/phases of schemes and is reliant on the provision and processing of scheme updates and delivery data from 31 local authorities. Where errors arise, these will be corrected in the next version published. The most recent published version therefore should always be referred to.
